

<b>Title</b>	Cessnock Environment Layer
<b>Abstract</b>	This single layer captures critical environmental features and biodiversity persistence for Cessnock Local Government Area (LGA) which covers 196,468 ha. The layer is in raster format with a 2 × 2 m cell size and is the result of consolidating layers that capture all aspects of biodiversity. Those consolidated layers contributed species composition information, structure/condition of habitat, and ecological function attributes at the same scale and with a common scoring. The common scale and scoring system allowed for direct comparison, making it possible to combine them into one single environment layer using a peer-reviewed scientific methodology.

It comprises 6 comprehensive map layers that collectively cover the entire Cessnock Local Government Area (LGA) and identify lands of environmental or ecological value.</p> <p>Function: download</p>
