Title	Cockrone Lagoon Flood Study
Abstract	Flood study centres around the opening of Cockrone Lagoon to the ocean when the water level exceeds the let-out-level of RL2.476m AHD. The policy is aimed at minimising the flooding of properties adjacent to the lagoon. The investigation process used in this flood study was: • collection of available data • assessment of available data • overview of lagoon behaviour • assessment of coastal processes • hydrologic modelling of the catchment to determine flood inflows, and • hydraulic modelling of the lagoon to assess flood levels from flood inflows
