#### Title Commonwealth Heritage List

#### **Abstract**

These data provide locational and attribute information for places on the Commonwealth Heritage List as determined by the Australian Government Department of the Environment, Heritage Branch. Data consist of Commonwealth Heritage List polygons with attribute information describing the place name, class (indigenous, natural, historic), and status. Places subject to confidentiality agreements are not included in these data. The location data for place nominations that are under internal assessment, have been rejected, are ineligible, removed or destroyed are not included in the publicly downloadable spatial dataset.

**Heritage List** Description:

> Web Map Service (WMS) is a standard protocol for serving georeferenced map images over the internet that are generated by a map server using data from a GIS Database

(NSW Government - Spatial Web Services Register June 2015). WMS allows a user to spatially visualise the dataset, but not query its features. This service is aimed at advanced geographical information users, and will require access to geographical

information system (GIS) software such as QGIS and ArcGIS/ArcMap.
