

Title	CRAFTI - Floristics, Southern CRA, South Coast Subregion. VIS_ID 4140
Alternative title(s)	CRA_SouthCoast_Floristics_E_4140
Abstract	CRAFTI stands for Comprehensive Regional Assessment Aerial Photograph Interpretation. In response to the National Forest Policy Statement, CRAFTI was designed as part of the CRA to provide raw data on growth stage and disturbance information of all Eucalypt forest and floristics over all or some defined regions as appropriate. This information was intended to contribute to 'old growth' assessments and also a floristics layer, which were required to satisfy aspects of the Regional Forest Agreement process. VIS_ID 4140

Download Package	Name: Download Package Protocol: WWW:DOWNLOAD-1.0-http--download Description: Data Function: download
Unique resource identifier	
Code	1ad75f67-464f-4f26-9253-5ea52ff3deba
Presentation form	Map digital
Edition	unknown
Dataset language	English
Metadata standard	
Name	ISO 19115
Edition	2016
Dataset URI	https://datasets.seed.nsw.gov.au/dataset/1ad75f67-464f-4f26-9253-5ea52ff3deba
Purpose	To contribute to 'old growth' assessments and also a floristics layer for the Southern CRA, South Coast Subregion.
Status	Completed
Spatial representation	
Type	vector
Spatial reference system	

Code identifying the spatial reference system	4283
Equivalent scale	1:None
Additional information source	CRAFTI Southern Report - A project undertaken as part of the NSW Comprehensive Regional Assessments. November 1999
Topic category	

Keyword set	
keyword value	VEGETATION FLORA
Originating controlled vocabulary	
Title	ANZLIC Search Words
Reference date	2008-05-16

Lineage	This project involves the mapping of forest and natural landscape features primarily through the technique of interpreting and delineating attribute classes on 1:25,000 scale aerial photography by experienced aerial photograph interpreters using transparent overlays followed by digital capture of the mapped data. 1:25,000 scale colour photography from the Land Information Centre was used for the project. 1:25 000 colour photos provide just enough detail to recognise the features of the growth stages in most forest types whilst enabling large areas to be covered quickly. Variation in photo scale, photo date, and especially photo quality makes it necessary to recalibrate photo identification procedures for each block of photography. For the Crookwell sheet, recent 1:25,000 were not available so it was necessary to use 1:50,000 scale. Existing mapping was provided as support for interpreters. This included forest type or similar vegetation cover maps, BOGMP photo overlays and floristic site information. In addition, other information was available in the form of plot data that was compiled by the NPWS CRA unit and the Project Co-ordinators.
