Title	Donnybrook Nature Reserve Vegetation 2012 VIS_ID 4726			
Alternative title(s)	DonnybrookNR_2012_E_4726			
Abstract	Donnybrook Nature Reserve vegetation mapping was undertaken by Dr John T. Hunter in 2012 by contract for the NPWS Northern Tableland Region. Donnybrook Nature Reserve is located approximately 20 km north west of Tenterfield.			
	The vegetation of the Donnybrook Nature Reserves is described and mapped (scale 1:25 000). Four communities and three sub-associations are defined based on classification (Kulczynski association). These four communities were mapped based on ground truthing, air photo interpretation and landform.

Lineage Dr John T. Hunter prepared the report of the vegetation of the Donnybrook Nature Reserve. Aims included the collation of existing information from previous floristic surveys and that the survey of a minimum of 10, 20 x 20 m stratified full vascular plant floristic sites is carried out in order to complete a comprehensive investigation of the vegetation and flora of the Donnybrook Nature Reserve. The report represents the findings of this study. The collated information is to be used as a guide for management purposes.

The requirements of the investigation were: 1. Collate existing information from previous vegetation surveys conducted within the conservation areas. 2. Site placement to be based on selected environmental variables and be distributed based on the area they occupy. 3. Identify weed species and their occurrence. 4. Identify EPB&C Act and TSC Act species and their occurrence. 5. Identify regionally significant species. 6. Provide known fire ecology information on species and communities. 7. Construction of a vegetation map based on communities as defined by classification. 8. Provide management recommendations.
