

Title	Duval Nature Reserve Vegetation 2014 VIS_ID 4728
Alternative title(s)	DuvalNR_2014_E_4728
Abstract	Duval Nature Reserve vegetation mapping was undertaken by Dr John T. Hunter in 2014 by contract for the NPWS Northern Tableland Region. Mt Duval Nature Reserve lies approximately 15 km north of Armidale within the Armidale Dumaresq Shire. The reserve were gazetted to conserve remnants of previously widespread Tablelands vegetation communities as part of the Regional Forest Agreement (RFA) process. The reserve has an area of approximately 243 ha and was dedicated in two stages in 1999. The vegetation of Mt Duval Nature Reserve is described and mapped (scale 1:10 000) based on ADS40 Imagery (2012). Five floristic communities are defined based on classification (Kulczynski association). These five communities were mapped based on ground truthing, air photo interpretation and landform. In addition ten Plant Community Types (VIS PCT) are also mapped along with two Threatened Ecological Communities (TECs). VIS_ID 4728

Lineage	Dr John T. Hunter prepared the report of the vegetation of Mt Duval Nature Reserve. The report represents the findings of a floristic survey and mapping program within the study area. The collated information is to be used as a guide for management purposes. The requirements of the investigation were: 1. Site placement to be based on selected environmental variables. 2. Identify weed species and their occurrence. 3. Identify EPB&C Act and TSC Act species and communities. 4. Construction of a vegetation map based on communities as defined by classification analyses and mapping of Threatened Ecological Communities (TECs). 5. Provide management recommendations.
