

Title	Environmental Planning Instrument - Key Sites
Alternative title(s)	EPI - Key sites
Abstract	<p>This spatial dataset identifies land allocated as Key Sites requiring future development to meet standards of design excellence as designated by the relevant NSW environmental planning instrument (EPI). The specific EPI which defines the planning requirement is described in the dataset next to the airport noise value and this EPI can be investigated on the NSW legislation website</p> <p>Contact <a href="mailto:data.broker@environment.nsw.gov.au">data.broker@environment.nsw.gov.au</a> for a data package (shapefile).</p>

**Unique resource identifier**

Code 51e81d1f-8fb7-4aee-92da-7cc157b8a5b6

Presentation form Map digital

Edition 1

Dataset language English

**Metadata standard**

Name ISO 19115

Edition 2016

Dataset URI <https://datasets.seed.nsw.gov.au/dataset/51e81d1f-8fb7-4aee-92da-7cc157b8a5b6>

Purpose This spatial data Provides information on planning requirements in NSW especially relating to allocation of land as Key Sites requiring future development to meet standards of design excellence

Status Completed

**Spatial representation**

Type vector

Geometric Object Type surface

## Spatial reference system

## Lineage

This spatial dataset reflects the current planning legislation in NSW in particular the maps and legislation published on the NSW legislation website ([www.legislation.nsw.gov.au](http://www.legislation.nsw.gov.au)). The data production usually occurs in conjunction with the development of the Environmental Planning Instrument (EPI) it is connected to. Original data inputs are produced by Local Government or the Department according to map and data standards developed by the Department and published externally via the website. These data inputs are checked by data and cartographic staff as well as planning staff internally against the map and data standards as well as for accurate content. Once the planning instrument is notified, the input data will be incorporated into the relevant LEP datasets. The quality management processes involved in the data production to this point are routinely screened by internal and external auditors for certification under ISO 9001 - Quality Management Systems. At this point the various datasets are then combined into a new normalised data schema to suit the requirements of the online Planning Viewer. This occurs via various automated ETL processes. Although every care is taken in ETL processes to maintain accuracy sometimes differences between inputs and final normalised data can occur
