

Title	Environmental Planning Instrument - Land Zoning
Alternative title(s)	Environmental planning Instrument LEP LZN
Abstract	<p>This spatial dataset identifies land use zones and the type of land uses that are permitted (with or without consent) or prohibited in each zone on any given land as designated by the relevant NSW environmental planning instrument (EPI) under the Environmental Planning and Assessment Act 1979. Land use zones are grouped into the following broad categories: BUSINESS (B), ENVIRONMENT (E), INDUSTRIAL (IN), RESIDENTIAL (R), RECREATION (RE), RURAL (RU), SPECIAL (SP) and WATERWAYS (W). The specific EPI which defines the planning requirement is described in the attribute field EPI_Name. The EPI can be viewed on the NSW legislation website: www.legislation.nsw.gov.au</p> <p>Contact data.broker@environment.nsw.gov.au for a data package (shapefile and geodatabase).</p>

- Browse the list of Layers.
- View Data for e.g. using ArcGIS.com
- View Map Service metadata: Initial/Full Extent, units, supported format types etc.,
- Drill down to individual tables/layers, view schema and run queries.

Function: download

WFS

Name: WFS

Protocol: WWW:DOWNLOAD-1.0-http--download

Description:

The layers listed below are exposed by this service. The individual will need to select the specific layer pertaining to this record from the exposed layers.

- Heritage
- Floor Space Ratio
- Land Zoning
- Land Reservation Acquisition
- Lot Size
- Height of Building
- Land Application

Function: download

Land Zoning Layer file

Name: Land Zoning Layer file

Protocol: WWW:DOWNLOAD-1.0-http--download

Description:

This is a ESRI Layer File for EPI Land Zoning.

The layer file stores symbology and relevant symbology classifications, labeling properties, as well as scale dependency and definition.

Function: download

ESRI Style file

Name: ESRI Style file

Protocol: WWW:DOWNLOAD-1.0-http--download

Description:

This is the ESRI style file to be used to apply symbology to the layer. The attribute used for the styling is SYM_CODE. You can find more details on how to work with Style files here: <http://desktop.arcgis.com/en/arcmap/10.3/map/styles-and-symbols/a-quick-tour-of-symbols-and-styles.htm>

Function: download

JSON

Name: JSON

Protocol: WWW:DOWNLOAD-1.0-http--download

Description:

The layers listed below are exposed by this service. The individual will need to select the specific layer pertaining to this record from the exposed layers.

- Heritage
- Floor Space Ratio
- Land Zoning
- Land Reservation Acquisition
- Lot Size
- Height of Building
- Land Application

Function: download

LZN RGB and HEX Code

Name: LZN RGB and HEX Code

Protocol: WWW:DOWNLOAD-1.0-http--download

Description:

RGB and HEX Codes for Land Zoning data

Unique resource identifier	
Code	1a6993e0-8f8a-4a3e-b6c6-0dd3b87c1efe
Presentation form	Map digital
Edition	1
Dataset language	English
Metadata standard

Lineage	This spatial dataset reflects the current planning legislation in NSW in particular the maps and legislation published on the NSW legislation website (www.legislation.nsw.gov.au). The data production usually occurs in conjunction with the development of the Environmental Planning Instrument (EPI) it is connected to. Original data inputs are produced by Local Government or the Department according to map and data standards developed by the Department and published externally via the website. These data inputs are checked by data and cartographic staff as well as planning staff internally against the map and data standards as well as for accurate content. Once the planning instrument is notified, the input data will be incorporated into the relevant LEP datasets. The quality management processes involved in the data production to this point are routinely screened by internal and external auditors for certification under ISO 9001 - Quality Management Systems. At this point the various datasets are then combined into a new normalised data schema to suit the requirements of the online Planning Viewer. This occurs via various automated ETL processes. Although every care is taken in ETL processes to maintain accuracy sometimes differences between inputs and final normalised data can occur.		
Limitations on public access			
Scope	dataset		
DQ Completeness Omission			
Effective date	2016-11-25		
Explanation	Some amendments with data partially or completely missing have been identified.		
DQ Topological Consistency			
Effective date	2016-11-25		
Explanation	Data has not been verified for its alignment with other EPI data or Cadastre		
DQ Non Quantitative Attribute Correctness			
Effective date	2016-11-25		
Explanation	Attributes implemented using Domains or Subtypes are 98% accurate
