

<b>Title</b>	Environmental Planning Instrument - Heritage (HER)
<b>Alternative title(s)</b>	EPI - HER
<b>Abstract</b>	<p>This spatial dataset identifies areas subject to Heritage conservation as designated by the relevant NSW environmental planning instrument (EPI) under the Environmental Planning and Assessment Act 1979. The specific EPI which defines the planning requirement is described in the attribute field LEP_Name. The EPI can be viewed on the NSW legislation website: <a href="http://www.legislation.nsw.gov.au">www.legislation.nsw.gov.au</a>.</p> <p>Contact <a href="mailto:data.broker@environment.nsw.gov.au">data.broker@environment.nsw.gov.au</a> for a data package (shapefile).</p>

ESRI style file

Name: ESRI style file  
Protocol: WWW:DOWNLOAD-1.0-http--download  
Description:  
This is the ESRI style file to be used to apply symbology to the layer. The attribute used for the styling is LAY\_CLASS. You can find more details on how to work with Style files here: <http://desktop.arcgis.com/en/arcmap/10.3/map/styles-and-symbols/a-quick-tour-of-symbols-and-styles.htm>  
Function: download

OGC SLD

Name: OGC SLD  
Protocol: WWW:DOWNLOAD-1.0-http--download  
Description:  
This is the OGC SLD layer descriptor file to be used to apply symbology schemes to the layer. The attribute used for the styling is LAY\_CLASS. You can find more details on how to work with SLD files here: [https://digimap.edina.ac.uk/webhelp/digimapgis/qgis/standard\\_qgis\\_functions/applying\\_style\\_files.htm](https://digimap.edina.ac.uk/webhelp/digimapgis/qgis/standard_qgis_functions/applying_style_files.htm)  
Function: download

JSON

Name: JSON  
Protocol: WWW:DOWNLOAD-1.0-http--download  
Description:  
The layers listed below are exposed by this service. The individual will need to select the specific layer pertaining to this record from the exposed layers.

- Heritage
- Floor Space Ratio
- Land Zoning
- Land Reservation Acquisition
- Lot Size
- Height of Building
- Land Application

**Lineage** This spatial dataset reflects the current planning legislation in NSW in particular the maps and legislation published on the NSW legislation website ([www.legislation.nsw.gov.au](http://www.legislation.nsw.gov.au)). The data production usually occurs in conjunction with the development of the Environmental Planning Instrument (EPI) it is connected to. Original data inputs are produced by Local Government or the Department according to map and data standards developed by the Department and published externally via the website. These data inputs are checked by data and cartographic staff as well as planning staff internally against the map and data standards as well as for accurate content. Once the planning instrument is notified, the input data will be incorporated into the LEP dataset. The quality management processes involved in the data production to this point are routinely screened by internal and external auditors for certification under ISO 9001 - Quality Management Systems. At this point the various datasets are then combined into a new normalised data schema to suit the requirements of the online Planning Viewer. This occurs via various automated ETL processes. Although every care is taken in ETL processes to maintain accuracy sometimes differences between inputs and final normalised data can occur.

#### Limitations on public access

Scope dataset

#### DQ Completeness Omission

Effective date 2016-11-25

Explanation Some amendments with data partially or completely missing have been identified.

#### DQ Topological Consistency

Effective date 2016-11-25

Explanation Data has not been verified for its alignment with other EPI data or Cadastre

#### DQ Non Quantitative Attribute Correctness

Effective date 2016-11-25

Explanation Attributes implemented using Domains or Subtypes are 98% accurate
