Title	Environmental Planning Instrument - Land Reclassification
Alternative title(s)	EPI - RPL
Abstract	This spatial dataset identifies public land classified or reclassified as either 'operational land' or 'community land' as designated by the relevant NSW environmental planning instrument (EPI). The specific EPI which defines the planning requirement is described in the dataset and this EPI can be investigated on the NSW legislation website

Description:

Display dataset on SEED's map

Function: download |
| Data Quality Statement | Name: Data Quality Statement

Protocol: WWW:DOWNLOAD-1.0-http--download

Description:

DQS - Standard Instrument Local Environmental Plan - Land Reclassification

Function: download |
| WMS - Land Reclassification | Name: WMS - Land Reclassification

Protocol: WWW:DOWNLOAD-1.0-http--download

Description:

The WMS service exposes the following EPI Landuse layers:

- Active Street Frontages
- Additional Permitted Uses
- Key Sites
- Land Reclassification
- Map tiles
- Urban Release Area

Function: download |
| ArcGIS REST Services Directory - EPI Landuse Layers | Name: ArcGIS REST Services Directory - EPI Landuse Layers

Protocol: WWW:DOWNLOAD-1.0-http--download

Description:

The URL directs users to the ArcGIS Server service directory of the EPI Landuse Layers - a view of REST API in HTML and allows users to: Browse the list of Layers. View Data for e.g. using ArcGIS.com View Map Service metadata: Initial/Full Extent, units, supported format types etc., Drill down to individual tables/layers, view schema and run queries

Unique resource identifier	
Code	77f0d264-b782-47b0-a937-8c0a8655a6b5

Presentation form	Map digital

Edition	1

Dataset language	English

Metadata standard	
Name	ISO 19115
Edition	2016

Dataset URI	https://datasets.seed.nsw.gov.au/dataset/77f0d264-b782-47b0-a937-8c0a8655a6b5

Purpose	This spatial dataset provides information on planning requirements in NSW especially relating to allocation of land as 'operational land' or 'community land'

Status	Completed

Spatial representation	
Type	vector
Geometric Object Type	surface

Spatial reference system	
Code identifying the spatial reference system	4283

Equivalent scale	1:None

Topic category

Keyword set

keyword value	HUMAN-ENVIRONMENT-Planning
	LAND-Use

Originating controlled vocabulary

Title	ANZLIC Search Words
Reference date	2008-05-16

Geographic location

West bounding longitude	141
East bounding longitude	154
North bounding latitude	-37
South bounding latitude	-28

Vertical extent information

Minimum value	-100
Maximum value	2228

Coordinate reference system

Authority code	urn:ogc:def:cs:EPSG::
Code identifying the coordinate reference system	5711

Temporal extent

Begin position	2014-05-23
End position	N/A

Dataset reference date

Lineage

This spatial dataset reflects the current planning legislation in NSW in particular the maps and legislation published on the NSW legislation website (www.legislation.nsw.gov.au). The data production usually occurs in conjunction with the development of the Environmental Planning Instrument (EPI) it is connected to. Original data inputs are produced by Local Government or the Department according to map and data standards developed by the Department and published externally via the website. These data inputs are checked by data and cartographic staff as well as planning staff internally against the map and data standards as well as for accurate content. Once the planning instrument is notified, the input data will be incorporated into the relevant LEP datasets. The quality management processes involved in the data production to this point are routinely screened by internal and external auditors for certification under ISO 9001 - Quality Management Systems. At this point the various datasets are then combined into a new normalised data schema to suit the requirements of the online Planning Viewer. This occurs via various automated ETL processes. Although every care is taken in ETL processes to maintain accuracy sometimes differences between inputs and final normalised data can occur
