

<b>Title</b>	Environmental Planning Instrument - Flood
<b>Alternative title(s)</b>	EPI - Flood
<b>Abstract</b>	<p>This spatial dataset identifies the land where development implications exist due to the risk of flood as designated by the relevant NSW environmental planning instrument (EPI). The specific EPI which defines the planning requirement is described in the dataset.</p> <p>Contact <a href="mailto:data.broker@environment.nsw.gov.au">data.broker@environment.nsw.gov.au</a> for this data package (shapefile)</p> <ul style="list-style-type: none"> <li>• Since 14 July 2021, councils are responsible for accurate flood mapping as it pertains to their local area. Therefore, this dataset may not be the latest version. Please contact the relevant local council to access the latest flood data.</li> </ul>

Contact details for spatial data package

Function: download

#### ESRI Style file

Name: ESRI Style file

Protocol: WWW:DOWNLOAD-1.0-http--download

Description:

This is the ESRI style file to be used to apply symbology to the layer. The attribute used for the styling is LAY\_CLASS. You can find more details on how to work with Style files here: <http://desktop.arcgis.com/en/arcmap/10.3/map/styles-and-symbols/a-quick-tour-of-symbols-and-styles.htm>

Function: download

#### OGC SLD

Name: OGC SLD

Protocol: WWW:DOWNLOAD-1.0-http--download

Description:

This is the OGC SLD layer descriptor file to be used to apply symbology schemes to the layer. The attribute used for the styling is LAY\_CLASS. You can find more details on how to work with SLD files here:

[https://digimap.edina.ac.uk/webhelp/digimapgis/qgis/standard\\_qgis\\_functions/applying\\_style\\_files.htm](https://digimap.edina.ac.uk/webhelp/digimapgis/qgis/standard_qgis_functions/applying_style_files.htm)

Function: download

#### JSON

Name: JSON

Protocol: WWW:DOWNLOAD-1.0-http--download

Description:

The layers listed below are exposed by this service. The individual will need to select the specific layer pertaining to this record from the exposed layers.

- Flood Planning
- Landslide Risk Land

Function: download

### Unique resource identifier

Code 46d55d37-da58-4607-8638-f33336b0a20c

Presentation form Map digital

Edition 22/05/2019

Dataset language English

### Metadata standard

Name ISO 19115

Edition 2016

Dataset URI <https://datasets.seed.nsw.gov.au/dataset/46d55d37-da58-4607-8638-f33336b0a20c>

Purpose This data identifies parcels of land that may be prone to flooding. It provides information on planning requirements in NSW especially relating to land where development implications exist due to the risk of flood. Since 14 July 2021, councils are responsible for flood mapping as it pertains to their local area. Therefore, this dataset may not be the latest version. Please contact the relevant local council to access the latest flood data.

Status Completed

**Lineage** This spatial dataset reflects the current planning legislation in NSW in particular the maps and legislation published on the NSW legislation website ([www.legislation.nsw.gov.au](http://www.legislation.nsw.gov.au)). The data production usually occurs in conjunction with the development of the Environmental Planning Instrument (EPI) it is connected to. Original data inputs are produced by Local Government or the Department according to map and data standards developed by the Department and published externally via the website. These data inputs are checked by data and cartographic staff as well as planning staff internally against the map and data standards as well as for accurate content. Once the planning instrument is notified, the input data will be incorporated into the relevant LEP datasets. The quality management processes involved in the data production to this point are routinely screened by internal and external auditors for certification under ISO 9001 - Quality Management Systems. At this point the various datasets are then combined into a new normalised data schema to suit the requirements of the online Planning Viewer. This occurs via various automated ETL processes. Although every care is taken in ETL processes to maintain accuracy sometimes differences between inputs and final normalised data can occur.
