

Title	Hornsby Local Government Area Threatened Ecological Communities, 2008. VIS_ID 4470
Alternative title(s)	HornsbyLGA_TEC_E_4470
Abstract	<p>Updated mapping of Threatened Ecological Communities (TECs). The native vegetation communities of Hornsby Shire were originally identified and mapped in 1990-1993. The present study updates the classification and mapping of 30 communities, with the updated mapping provided in digital form for inclusion in the council's GIS. The survey area included all of the Hornsby LGA, from Eastwood to Brooklyn to Wisemans Ferry, excluding Marramarra NP, Muogamarra NR, Long Island NR, and Ku-ring-gai Chase NP east of the Sydney-Newcastle Freeway.</p> <p>In the initial study, the classification of the plant communities was based on the floristic composition of the tallest vegetation layer (usually the tree species composition). The assessment was subjective but based on species data from a total of 404 sample sites. An additional 209 sites were examined for the updated study. The classification has been refined to include 8 EECs, two rainforest communities (instead of one in the original classification), and recognition of the distinctive vegetation of Dangar Island as a separate community. VIS_ID 4470</p> <p>Please note the related datasets: 1. Hornsby Local Government Area Vegetation Communities, 2008. VIS_ID 4471 2. Hornsby Local Government Area Remnant Trees, 2008. VIS_ID 4472</p>

Lineage	Revision of 1990-93 vegetation mapping to include 8 TECs. Tree species data collected from 209 sample sites between February and July 2006. Correction of mapped vegetation polygons based on air photos, mostly high definition colour photos taken in January 2005, using MapInfo. Hard copy photos (1:11,000-1:18,000) also examined .
