Title	Joint Vegetation Mapping Project: Brigalow Belt South Bioregion, Extant Vegetation model VIS_ID 1649			
Alternative title(s)	BRIGALOWBELTSTH_COMP_E_1649			
Abstract	The JVMP produced an extant vegetation model, presented in mapped form, for the BBS bioregion. The map shows the modelled distribution of extant vegetation, identified through aerial photography and satellite image interpretation. The extant vegetation model was restricted to the extant woody vegetation with an approximate crown canopy projection of greater than 10% and identified open woodland / grassland vegetation groups. The extant vegetation model was designed as a tool suitable for landscape level planning at a bioregional scale. VIS_ID 1649
