Title	LEP Assessment tool for Water Related Clauses
Alternative title(s)	LEP Assessment Tool
Abstract	The LEP Assessment Tool is a Microsoft® Excel® (for Office 365) spreadsheet that contains all water related clauses for 65 LEPs that were in force across coastal NSW, prior to provisions for LSPSs under the EP&A Act 1979.
	This tool provides you with immediate access to water-related clauses in LEPs, and functions primary as a search tool of what LEPs cover. The tool was designed as a resource to facilitate effective and consistent reviews of the content of water related clauses in LEPs.
	It helps you assess if your stated zone objectives are appropriate and comprehensive given the water-related requirements in the clauses themselves, and whether they are responsive to the priorities and issues of your community.

Edition	2016					
Dataset URI	https://datasets.se	eed.nsw.gov.au/dataset/a0064dac-1155-428c-a838-dd6d678f4db5				
Purpose	This tool is for anyone involved in the development of a Local Environmental Plan (LEP). This could include Local Council staff members such as natural resource managers and strategic planners.					
Status	Completed					
Spatial representation type	textTable					
Spatial reference	Spatial reference system					
Code identifying the spatial reference system	4283					
Spatial resolution	0 m					
Additional information source	The accompanying technical report describes how the tool was developed, how to use the tool in context of achieving water quality and waterway health outcomes for your area, and some key findings of our use of the tool. These findings include the gaps or missing provisions for waterway health and stormwater management in LEPs, exemplar clauses that could be adopted due to a precedence and minor changes to the content of clauses to strategically align with state water quality policy.
