Title	Map of Renewable Energy Resources of NSW
Alternative title(s)	Renewable Energy Map
Abstract	In July 2016, the Geological Survey of New South Wales released the first comprehensive statewide renewable energy resource map, documenting NSWs resource potential and existing infrastructure for solar, wind, geothermal, bioenergy, hydro and ocean resources. This product has been created to be an informative tool enabling the community to more easily identify and understand the renewable energy and resource potential of the state.

Lineage	This map was produced by the Geological Survey of New South Wales. First released in 2016 and updated in November 2017 and January 2019, the map comprehensively documents NSW potential and existing infrastructure for solar, wind, geothermal, bioenergy, hydro and wave resources. It also shows small-scale solar and pumped hydro information and the renewable energy project pipeline. This product is designed to be an informative tool enabling the community to easily identify and understand the renewable energy and resource potential of the state.
