

Title	Mine annual submission disturbance and rehabilitation data
Abstract	<p>The annual submission spatial data set provides information on where large mines in NSW have conducted ground disturbance and rehabilitation activities across the mine site in the past year. This information is created and submitted on an annual basis by each mine to fulfil Annual Rehabilitation Reporting requirements required under Schedule 8A of the Mining Regulation 2016.</p> <p>The collection of this spatial data is administered by the Resources Regulator in NSW who conducts reviews of the data submitted for assessment purposes. In some cases, information provided may contain inaccuracies that require adjustment following the assessment process by the Regulator. The Regulator will request data resubmission if issues are identified.</p> <p>Further information on the reporting requirements associated with mine rehabilitation can be found at https://www.resourcesregulator.nsw.gov.au/rehabilitation/mine-rehabilitation.</p> <p>Find more information about the data at https://www.seed.nsw.gov.au/annual-submission-data-layer</p> <p>Any data related questions should be directed to nswresourcesregulator@service-nsw.com</p>
