Title	Mine Rehabilitation Data
Abstract	The mine rehabilitation dataset provides information on where mining operations in NSW have been conducted and are forecast to conduct ground disturbance and rehabilitation activities, as well as the final landuse and landform following the completion of mining and rehabilitation activities. This information is created and submitted by each large mine operator to fulfil spatial data submission requirements required under Schedule 8A of the Mining Regulation 2016. The collection of this spatial data is administered by the Resources Regulator in NSW who conducts reviews of the data submitted for assessment purposes. In some cases, information provided may contain inaccuracies that require adjustment following the assessment process by the Regulator. The Regulator will request data resubmission if issues are identified. Further information on the reporting requirements associated with mine rehabilitation can be found at https://www.resourcesregulator.nsw.gov.au/rehabilitation/mine-rehabilitation. Any data related questions should be directed to nswresourcesregulator@service-now.com

ArcGIS REST Service	Name: ArcGIS REST Service
	Protocol: WWW:DOWNLOAD-1.0-http--download
	Description:
	An ArcGIS Server web service represents a GIS resource such as a map, locator, or image that is located on an ArcGIS Server site and is made available to client applications. This service is aimed at advanced geographical information users, and will require access to geographical information system (GIS) software such as ArcGIS/ArcMap.
	Function: download

Unique resource identifier

Code	9fa7d5a9-c5e1-45e1-af56-0a275746f18e

Presentation form	Map digital

Dataset language	English

Metadata standard

Name	ISO 19115
Edition	2016

Dataset URI	https://datasets.seed.nsw.gov.au/dataset/9fa7d5a9-c5e1-45e1-af56-0a275746f18e
Purpose	The collection of this spatial data is administered by the NSW Resources Regulator who conducts reviews of the data submitted for assessment purposes.
Status	On going
