Lineage	The dataset was created using a composite layer of linework from DNR (Steward Lukas, DNR, Albany). For further information about the linework, please see: • The report for which this dataset was created: "The Native Vegetation of the Southern Wheat-Sheep Belt", NSW Department of Environment and Climate Change, June 2007; Part 2. • "Combined Vegetation Layer for Murrumbidgee Region", Wil Allen, 12 June 2007 (DECC electronic version: N:\Planning and Aboriginal Heritage\2007\06-Planning\LEP\Combined Murrumbidgee Tree Cover & Regional Veg Map -Meta data.doc). The linework was then attributed with vegetation types from the composite pre1750 dataset that accompanies the "Wheat-Sheep Belt"-report (for further information, see metadata statement for the composite pre1750 layer). The composite linework layer was then cut to the NSW South Western Slopes (NSS - IBRA bioregion) which falls within the Murray CMA. Attribute fields: • FID: Internal feature number • Shape: Feature geometry • Density: Tree density codes • Landuse: Land use codes • Source: DNR map source (Note: some are blank) • BVCS: Vegetation community (for Murray Mapping area only) • GRIDCODE: Grid code • ObjectID: A distinct number to denote vegetation type ("Label_092") by original mapping source ("Source_72") • Source_072: The original regional mapping source of the record • Veg_ID_072: The original vegetation code given in the source mapping • Label_092: The new vegetation community name (PVP type) from composite regional vegetation map • Dk_no2: The vegetation class code (Keith) • Dk_name2: The vegetation class name (Keith) • Dk_broad2: The broad vegetation group name (Keith) • Dk_no_name2: The vegetation class number and name (Keith) • Vegetation: Vegetation community (type) in Label_092, unless DNR linework attributed landuse that excludes native vegetation (f. ex. Plantation, water etc.) • Tree_cover: Type of tree cover • Source_: See "Source"-field above • Acres: Acres • Hectares: Hectares
