

<b>Title</b>	National Heritage List
<b>Abstract</b>	<p>These data provide locational and attribute information for places nominated to and included in the National Heritage List as determined by the Australian Government managed by the Department of the Environment, Wildlife Division. National Heritage List polygons with attribute information describing the place name, class (indigenous, natural, historic), and status. Places subject to confidentiality agreements are included in these data but the location is generalised to the bounding 250k mapsheet. The location data for place nominations that have been rejected, are ineligible, removed or destroyed are not included in the publicly downloadable spatial dataset.</p>

over the internet that are generated by a map server using data from a GIS Database (NSW Government - Spatial Web Services Register June 2015). WMS allows a user to spatially visualise the dataset, but not query its features. This service is aimed at advanced geographical information users, and will require access to geographical information system (GIS) software such as QGIS and ArcGIS/ArcMap
