Title	Native Vegetation Map of Gundagai Shire. VIS_ID 3957		
Alternative title(s)	GundagaiLGA_2005_E_3957		
Abstract	Current or extant distribution of native vegetation in Gundagai Shire. The mapping project involved initial stratification of the shire into units based on broad geological types, average annual temperature and average annual rainfall. Different environmental units were sampled by a vegetation plot survey. These surveys recorded all vascular plant species (ie herbs, grasses, forbs, shrubs, trees and ferns) and their abundance within over 200 plots, each with an area of 400m2 (ie 20m x 20m). VIS_ID 3957

geol envi vasc	The mapping project involved initial stratification of the shire into units based on broad geological types, average annual temperature and average annual rainfall. Different environmental units were sampled by a vegetation plot survey. These surveys recorded all vascular plant species (ie herbs, grasses, forbs, shrubs, trees and ferns) and their abundance within over 200 plots, each with an area of 400m2 (ie 20m x 20m).		
thes	data was then used to identify plant communities within the shire and the distribution of e communities in relation to a multitude of parameters including geology, soil type, e, topography, aspect, temperature and rainfall.
