

Title	Native Vegetation Mapping of the Dandaloo 1:100 000 VIS_ID 1598
Alternative title(s)	Dandaloo_NVMP_VISmap_1598
Abstract	This report describes the native vegetation communities that occur within the Bogan Gate, Boona Mount, Condobolin, Dandaloo, Tottenham and Tullamore 1: 100 000 map sheets. Native vegetation includes both woody (i.e. open forests, woodlands and open woodlands) and non-woody communities (i.e. grasslands and forblands). The study area is located in the central western region of New South Wales. It encompasses parts of six Local Government Areas: Bogan, Forbes, Lachlan, Narromine, Parkes and Warren; and includes the major settlements of Condobolin, Forbes (western part), Tottenham, Trangie, Trundle and Tullamore. It incorporates parts of three Native Vegetation Regions: North Lachlan - Bogan; Mid-Lachlan; and Lower Macquarie - Castlereagh. (VIS ID 1598)

Lineage	Assignment of floristic groups to remote-sensing map units based on plot intersection frequencies. Remote imagery and spatial environmental data\nVeg types derived from PATN analysis of plot data. Map units defined by API. Map units described on the basis of the most common veg types (floristic groups) determined by intersection of plots. 850 plots sampled in total: 516 woody plots, each 0.1 ha in size; 334 non-woody plots each 0. (VIS ID 1598)
