| Title | NSW biodiversity outlook report |
| Abstract | <p>This landing page provides links to collections of data packages supporting outlook reports of the NSW Biodiversity Indicator Program.</p> <p>NSW Biodiversity Indicator Program</p> <p>The Biodiversity Indicator Program reports on the state and trends over time of biodiversity and ecological integrity in New South Wales. The program was established by the <i>Biodiversity Conservation Act 2016</i>. We have developed a framework of indicators to help scientists, managers and policy-makers understand the current state of biodiversity, how it has changed from the past, and how it is likely to change in the future.</p> <p>NSW biodiversity outlook report</p> <p>The NSW biodiversity outlook report is a summary of the state of biodiversity and ecological integrity in New South Wales. It is based on rigorous science and has been peer reviewed by recognised experts. New reports are published from time to time as data become available and are analysed. Each report covers the set of indicators from the framework that have been developed and are ready for publication at that time.</p> |
