Title	NSW Identified Wilderness
Alternative title(s)	IDWild
Abstract	Boundaries of identified wilderness areas in NSW under S.6 of the Wilderness Act 1987.
	Under the Wilderness Act 1987, wilderness is land which: • is substantially unmodified by humans or is capable of restoration; • is of sufficient size be maintained in an unmodified state; and • is capable of providing opportunities for solitude and appropriate self-reliant recreation.
	An area can be nominated as wilderness by any person or organisation. Those lands are assessed by the Department of Planning and Environment to determine whether they meet the wilderness criteria. Lands found to meet the criteria in the Act are identified as wilderness by the Department of Planning and Environment. Identified wilderness differs from declared wilderness. Identified wilderness is a recognition of an area's values, whereas declared wilderness has statutory protection and must be managed in a way which will maintain its wilderness values.

ArcGIS REST Service: NSW Identified Wilderness	Name: ArcGIS REST Service: NSW Identified Wilderness
	Protocol: WWW:DOWNLOAD-1.0-http--download
	Description:
	An ArcGIS Server web service represents a GIS resource such as a map, locator, or image that is located on an ArcGIS Server site and is made available to client applications. Depending on the layers enabled, this web service allows a user to query its features and/or visualise the dataset. This service is aimed at advanced geographical information users, and will require access to geographical information system (GIS) software such as ArcGIS/ArcMap.
	Function: download

Unique resource identifier

Code	242c3f04-0ddc-4ed7-9573-ea1ddf93e3cd
Presentation form	Map digital

Edition	Unknown
Dataset language	English

Metadata standard

Name	ISO 19115
Edition	2016

Dataset URI	https://datasets.seed.nsw.gov.au/dataset/242c3f04-0ddc-4ed7-9573-ea1ddf93e3cd
Purpose	Legislative and Regulatory requirements
Status	On going

Spatial representation

Type	vector
Geometric Object Type	complex
Geometric Object Count	147

Spatial reference system

Code identifying the spatial reference system	4283

Spatial resolution	1000 m

Topic category

Keyword set	
keyword value	Environment

Lineage	Some of the linework in this database is yet to be verified. Linework captured prior to 2000-2001 is of low accuracy. These are documented on a map prepared by the Reserve Establishment & Land Information Unit. The Reserve Establishment & Land Information Unit captures the boundaries from the best available maps of 1:4 000, 1:10 000, 1:25 000, 1:50 000, 1:100 000 or 1:250 000 scale. The positional accuracy of all linework is dependent upon the scale of the source maps and is detailed in the 'linework' field.
