

Title	NSW Imagery
Abstract	<p>The NSW Imagery web service provides access to a repository of the Spatial Services (DCS) maintained standard imagery covering NSW, plus additional sourced imagery. It depicts an imagery map of NSW showing a selection of LANDSAT® satellite imagery, standard 50cm orthorectified imageries, High resolution 10cm Town Imageries. It also contains high resolution imageries within multiple areas of NSW within DFSI, Spatial Services maintained projects and captured by AAM, VEKTA and Jacobs (previously SKM). The image web service is updated periodically when new imageries are available. The imageries are shown progressively from scales larger than 1:150,000 higher resolution imagery overlays lower resolution imagery and most recent imagery overlays older imagery within each resolution. The characteristics of each image such as accuracy, resolution, viewing scale, image format etc varies by sensor, location, capture methodology, source and processing. For specific information about the metadata for the imagery used, please refer to the individual data series within the NSW Data Catalogue. As a consequence of the variety of source data, each map displayed by the user within this map service may have a number of copyright permissions. It is emphasised that the user should check the use constraints for each image data series.</p> <hr/> <p><i>NOTE: Please contact the Customer HUB <a href="https://customerhub.spatial.nsw.gov.au/">https://customerhub.spatial.nsw.gov.au/</a> for advice on datasets access.</i></p> <hr/>

<a href="#">PDF Data Quality Statement - NSW Imagery</a>	<p>Name: PDF Data Quality Statement - NSW Imagery</p> <p>Protocol: WWW:DOWNLOAD-1.0-http--download</p> <p>Description:</p> <p>The Data Quality Statement is for users to understand how a particular dataset could be used and whether it can be compared with other, similar datasets. It provides a description of the characteristics of the data to help the user decide whether the data will be fit for their specific purpose (ICT Strategy, NSW Government accessed 23rd May 2016)</p> <p>Function: download</p>
<a href="#">WMS - NSW Imagery</a>	<p>Name: WMS - NSW Imagery</p> <p>Protocol: WWW:DOWNLOAD-1.0-http--download</p> <p>Description:</p> <p>Web Map Service (WMS) is a standard protocol for serving georeferenced map images over the internet that are generated by a map server using data from a GIS Database (NSW Government - Spatial Web Services Register June 2015). WMS allows a user to spatially visualise the dataset, but not query its features. This service is aimed at advanced geographical information users, and will require access to geographical information system (GIS) software such as QGIS and ArcGIS/ArcMap</p> <p>Function: download</p>
<a href="#">WMTS - NSW Imagery</a>	<p>Name: WMTS - NSW Imagery</p> <p>Protocol: WWW:DOWNLOAD-1.0-http--download</p> <p>Description:</p> <p>Web Map Service (WMTS) is a standard protocol for serving pre-rendered</p>

georeferenced map tiles over the internet that are generated by a map server using data from a GIS Database. WMTS allows a user to spatially visualise the dataset, but not query its features. This service is aimed at advanced geographical information users, and will require access to geographical information system (GIS) software such as QGIS and ArcGIS/ArcMap.

Function: download

[ArcGIS REST SERVICE - NSW Imagery](#)

Name: ArcGIS REST SERVICE - NSW Imagery

Protocol: WWW:DOWNLOAD-1.0-http--download

Description:

An ArcGIS Server web service represents a GIS resource—such as a map, locator, or image—that is located on an ArcGIS Server site and is made available to client applications. Depending on the layers enabled, this web service allows a user to query its features and/or visualise the dataset. This service is aimed at advanced geographical information users, and will require access to geographical information system (GIS) software such as ArcGIS/ArcMap.

Function: download

## Unique resource identifier

Code 5601b661-3352-47ad-a8e5-09278927226f

## Presentation form

Dataset language English

## Metadata standard

Name ISO 19115  
Edition 2016

Dataset URI <https://datasets.seed.nsw.gov.au/dataset/5601b661-3352-47ad-a8e5-09278927226f>

Spatial representation type None

## Spatial reference system

Code identifying the spatial reference system 4283
