

Title	NSW Landuse 2017
Alternative title(s)	Landuse Mapping for NSW 2017
Abstract	<p>PLEASE NOTE: This dataset has been superseded by NSW Landuse 2017 v1.5</p> <p>The 2017 Landuse captures how the landscape in NSW is being used for food production, forestry, nature conservation, infrastructure and urban development. It can be used to monitor changes in the landscape and identify impacts on biodiversity values and individual ecosystems.</p> <p>The NSW 2017 Landuse mapping is dated September 2017.</p> <p>It incorporates tenure based information for National Parks and State Forests in NSW, at the time of mapping.</p> <p>It currently does not include the Greater Sydney Metropolitan Region. Greater Sydney region will be completed in late 2019 and will be incorporated into the NSW 2017 land use product version 1.1. The NSW Landuse 2013, currently contains the best available information for the Greater Sydney region. https://datasets.seed.nsw.gov.au/dataset/nsw-landuse-2013</p> <p>The 2017 Landuse has complete coverage of all regional centres and towns for NSW. It also includes updates to the fine scale Horticulture mapping for the east coast of NSW - Newcastle to the Queensland boarder. This horticultural mapping includes operations to the commodity level based on field work and high resolution imagery interpretation.</p> <p>The reliability scale is 1:10,000 and include values in the attribute fields of Source, Source Date, Source Scale, Reliability and LU Mapping (Currency) Date.</p> <p>Land use has been mapped on high resolution aerial imagery including ADS (digital imagery) captured by NSW Department of Finance, Service and Innovation, along with using Nearthmap, Google Earth and Google Street View. Satellite imagery from LANDSAT (NASA), Sentinel 2 (European Space Agency), SPOT 5, 6 and 7(Airbus) and Planet Imagery, was used in the mapping process to account for Landuse activities that occur as part of a rotational practise.</p> <p>Land use information has been captured in accordance with standards set by the Australian Collaborative Land Use Mapping Program (ACLUMP) and using the Australian Land Use and Management ALUM Classification Version 8. The ALUM classification is based upon the modified Baxter & Russell classification and presented according to the specifications contained in http://www.agriculture.gov.au/abares/aclump/land-use/alum-classification.</p> <p>This product will be incorporated in the National Catchment scale land use product 2018 that will be available as a 50m raster - Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES) http://www.agriculture.gov.au/abares/aclump/land-use/data-download</p>

Lineage	Landuse data for NSW is captured in accordance with standards from Australian Collaborative Landuse Mapping Program, using the Australian Land Use and Management classification ALUM version 8.
Limitations on public access	

Scope	dataset
DQ Completeness Commission	
Effective date	2019-02-05
DQ Completeness Omission	
Effective date	2019-02-06
Explanation	Excludes the Greater Sydney Region. This will be incorporated in version 1.1 of the dataset. Update is likely to occur in mid-late 2019.
DQ Topological Consistency	
Effective date	2019-02-06
Explanation	Topology has been applied to this dataset
DQ Absolute External Positional Accuracy	
Effective date	2019-02-06
Explanation	Positional accuracy is with 10m of on-ground position based on spatial precision of imagery used.
DQ Non Quantitative Attribute Correctness	
Effective date	2019-02-06
