

Title	NSW Native Vegetation Extent Raster 5m v1.4
Alternative title(s)	NSW_Candidate_Native_Vegetation_v1p2_5m_2017
Abstract	<p>The purpose of this layer is to help discriminate native tree cover and woodlands from other terrain elements.</p> <p>The NSW Native Vegetation Extent 5m Raster v1.4 was developed under the State Vegetation Type Map program (SVTM) and presents a single surface raster that combines the best available information on native vegetation extent for NSW. The surface differentiates tree cover from candidate native grasslands, water, forestry plantations and a woodland matrix from non-native areas.</p> <p>The surface is built on the 2011 5m NSW Woody Vegetation Extent (Fisher et al., 2016), with updates up to 2018 (Fisher et al., 2017), with the addition of candidate native grasslands, woodlands and wetlands from the visual interpretation of high-resolution imagery (OEH, 2017).</p> <p>The NSW Native Vegetation Extent 5m Raster v1.4 is an integration of five existing datasets which map candidate native vegetation and water bodies for NSW. The sourcing rules from each dataset are documented in the metadata statement at the link below.</p> <p>All Koala Habitat Information Base (KHIB) datasets are available for download below under 'Dataset Relationship'</p> <p>For further information on the data layers and their development, please see the Koala Habitat Information Base Technical Guide.</p>

WMS - NSW Native Vegetation Extent 5m Raster v1.4	<p>Name: WMS - NSW Native Vegetation Extent 5m Raster v1.4</p> <p>Protocol: WWW:DOWNLOAD-1.0-http--download</p> <p>Description:</p> <p>Web Map Service (WMS) is a standard protocol for serving georeferenced map images over the internet that are generated by a map server using data from a GIS Database (NSW Government - Spatial Web Services Register June 2015). WMS allows a user to spatially visualise the dataset, but not query its features. This service is aimed at advanced geographical information users, and will require access to geographical information system (GIS) software such as QGIS and ArcGIS/ArcMap.</p> <p>Function: download</p>

[ArcGIS REST Services Directory - NSW Native Vegetation Extent 5m Raster v1.4](#)

Name: ArcGIS REST Services Directory - NSW Native Vegetation Extent 5m Raster v1.4
Protocol: WWW:DOWNLOAD-1.0-http--download
Description:
ArcGIS REST Services Directory - provides a variety of interfaces for web browsers, GIS users and developers, to view maps
Function: download

Unique resource identifier

Code 72d14092-9088-48a4-896b-3a95a7e566d1

Presentation form Map digital

Edition 1.4

Dataset language English

Metadata standard

Name ISO 19115

Edition 2016

Dataset URI <https://datasets.seed.nsw.gov.au/dataset/72d14092-9088-48a4-896b-3a95a7e566d1>

Purpose To provide a state-wide seamless native vegetation extent at a 5m resolution

Status Completed

Spatial representation type grid

Spatial reference system

Code identifying the spatial reference system 4283

Spatial resolution 5 m
