

Title NSW Points of Interest (POI)

Abstract

The Points of Interest (POI) web service provides the identification and location of a feature, service or activity that people may want to see, know about or visit. POI features for this service are primarily derived from features maintained within the Digital Topographic Database (DTDB). The POI feature class is maintained programmatically (automated) by sourcing spatial and aspatial attributes from other feature classes in the DTDB that contain POI features. The midpoint of a line or polygon features is used to define the POI. Points of Interest include features related to Community, Education, Recreation, Transportation, Utility, or Hydrography, Physiography and Place, and defined as a place with a prescribed name. The attribute information for an individual dataset may have been thinned or modified to cater for the service. The service is available in a cached environment only. This dataset is compliant with the NSW FSDF and its specifications. For details information for each individual dataset contained in this web services.

NOTE: Please contact the Customer HUB <https://customerhub.spatial.nsw.gov.au/> for advice on datasets access.

Resource locator

[Show on SEED Web Map](#)

Name: Show on SEED Web Map
Protocol: WWW:DOWNLOAD-1.0-http--download
Description:
Display dataset on SEED's map
Function: download

[Show on SEED Web Map](#)

Name: Show on SEED Web Map
Protocol: WWW:DOWNLOAD-1.0-http--download
Description:
Display dataset on SEED's map
Function: download

[External Metadata Page - NSW Points of Interest \(POI\)](#)

Name: External Metadata Page - NSW Points of Interest (POI)
Protocol: WWW:DOWNLOAD-1.0-http--download
Description:
The following link will redirect you to an external page outside of SEED to access the resource
Function: download

[PDF Data Quality Statement - NSW Points of Interest \(POI\)](#)

Name: PDF Data Quality Statement - NSW Points of Interest (POI)
Protocol: WWW:DOWNLOAD-1.0-http--download
Description:
The Data Quality Statement is for users to understand how a particular dataset could be used and whether it can be compared with other, similar datasets. It provides a description of the characteristics of the data to help the user decide whether the data will be fit for their specific purpose (ICT Strategy, NSW Government accessed 23rd May 2016)
Function: download

[WMS - NSW Points of Interest \(POI\)](#)

Name: WMS - NSW Points of Interest (POI)
Protocol: WWW:DOWNLOAD-1.0-http--download
Description:
Web Map Service (WMS) is a standard protocol for serving georeferenced map images over the internet that are generated by a map server using data from a GIS

Database (NSW Government - Spatial Web Services Register June 2015). WMS allows a user to spatially visualise the dataset, but not query its features. This service is aimed at advanced geographical information users, and will require access to geographical information system (GIS) software such as QGIS and ArcGIS/ArcMap.

Function: download

[ArcGIS REST SERVICE - NSW Points of Interest \(POI\)](#)

Name: ArcGIS REST SERVICE - NSW Points of Interest (POI)

Protocol: WWW:DOWNLOAD-1.0-http--download

Description:

An ArcGIS Server web service represents a GIS resource—such as a map, locator, or image—that is located on an ArcGIS Server site and is made available to client applications. Depending on the layers enabled, this web service allows a user to query its features and/or visualise the dataset. This service is aimed at advanced geographical information users, and will require access to geographical information system (GIS) software such as ArcGIS/ArcMap.
