Title	NSW Priority Oyster Aquaculture Areas
Abstract	Oyster aquaculture areas are areas of NSW estuaries assessed for edible oyster aquaculture. These areas were categorised by assessment of all current, former and potential leases in relation to their location, environmental and socio-economic criteria and within the boundaries developed in co-operation with all relevant State government agencies, neighboring communities and the oyster industry. The areas are categorized as priority oyster aquaculture areas, terminating current lease area, current leases within the national parks estate and lease area under Merimbula Airport jurisdiction

| PDF Metadata - NSW Priority Oyster Aquaculture Areas | Name: PDF Metadata - NSW Priority Oyster Aquaculture Areas

Protocol: WWW:DOWNLOAD-1.0-http--download

Description:

Metadata is data that defines or describes the content, quality, format or structure of a dataset or information asset (NSW Government Standard Approach to Metadata July 2014)

Function: download |
| PDF Data Quality Statement - NSW Priority Oyster Aquaculture Areas | Name: PDF Data Quality Statement - NSW Priority Oyster Aquaculture Areas

Protocol: WWW:DOWNLOAD-1.0-http--download

Description:

The Data Quality Statement is for users to understand how a particular dataset could be used and whether it can be compared with other, similar datasets. It provides a description of the characteristics of the data to help the user decide whether the data will be fit for their specific purpose (ICT Strategy, NSW Government accessed 23rd May 2016)

| WMS - NSW Priority Oyster Aquaculture Areas | Name: WMS - NSW Priority Oyster Aquaculture Areas

Protocol: WWW:DOWNLOAD-1.0-http--download

Description:

Web Map Service (WMS) is a standard protocol for serving georeferenced map images over the internet that are generated by a map server using data from a GIS Database (NSW Government - Spatial Web Services Register June 2015).

WMS allows a user to spatially visualise the dataset, but not query its features.

This service is aimed at advanced geographical information users, and will require access to geographical information system (GIS) software such as QGIS and |

[ArcGIS REST SERVICE - NSW Priority Oyster Aquaculture Areas](#)	ArcGIS/ArcMap.
	Function: download
	Name: ArcGIS REST SERVICE - NSW Priority Oyster Aquaculture Areas
	Protocol: WWW:DOWNLOAD-1.0-http--download
	Description:
	An ArcGIS Server web service represents a GIS resource—such as a map, locator, or image—that is located on an ArcGIS Server site and is made available to client applications.
	Depending on the layers enabled, this web service allows a user to query its features and/or visualise the dataset.
	This service is aimed at advanced geographical information users, and will require access to geographical information system (GIS) software such as ArcGIS/ArcMap.
	Function: download
