

Title	NSW Vegetation Integrity
Abstract	This is the landing page for NSW Vegetation Integrity modelling. Linked to this page are assets for each of the versions of modelling for the state. The current most up-to-date version is NSW Vegetation Integrity modelling - v2 (December 2024). Details on the methods used in version 2 are explained in the following publication: Gale, M, McNellie, M.J., Dorrough, J., and Gibbons, P. (in prep). Predicting vegetation integrity using vegetation site data, environmental covariates, and remote sensing: implementing at broad scale and quantifying uncertainty (Will be submitted to 'Science of the Total Environment' journal)
