

Title	Rainforest Mapping for NE NSW. VIS ID 3887
Alternative title(s)	Rainforest_NE_NSW_E_3887
Abstract	Rainforest Polygons, Lines and Points collated during and after the Comprehensive Regional Assessment process. ; ; Rainforest Polygons were extracted from the Successional Stages layer which was a product of the CRAFTI 2000 project; that updated CRA layers used in the RFA negotiations for UNE and LNE. Both Floristics & Structure have been updated as part of the CRAFTI 2000 project and hence feed into creating successional stage data. The data represents the most up to date layers for Successional Stages (ie. Old Growth, Rainforest etc) as of April 2002.; ; Rainforest Lines contain narrow patches of rainforest that were less than fifty metres wide and more than two hundred metres long which were captured into a line location dataset.; ; Rainforest Points contains areas of rainforest less than two hectares which were captured as a point with an alphabet code string delineating rainforest or dry rainforest.; ; To display the most up to date and comprehensive rainforest you must display all three files.; ; NB. Because CRAFTI includes other veg mapping, where other mapping was already completed, (eg. RN17 Forest Type mapping, NRAC veg mapping) the rainforest layer is also a combination of that mapping. VIS ID 3887

Unique resource identifier	
Code	e7840ad0-28fd-4d5a-a063-3940a18d5c4d
Presentation form	Map digital
Edition	unknown
Dataset language	English
Metadata standard	
Name	ISO 19115
Edition	2016
Dataset URI	https://datasets.seed.nsw.gov.au/dataset/e7840ad0-28fd-4d5a-a063-3940a18d5c4d
Purpose	Vegetation Mapping
Status	Completed
Spatial representation	
Type	vector

Spatial reference system	
Code identifying the spatial reference system	4283
Equivalent scale	1:None
Topic category	

Keyword set	
keyword value	VEGETATION-Structural
Originating controlled vocabulary	
Title	ANZLIC Search Words
Reference date	2008-05-16
Geographic location	
West bounding longitude	141
East bounding longitude	154
North bounding latitude	-38
South bounding latitude	-28
Vertical extent information	
Minimum value	-100
Maximum value	2228
Coordinate reference system	
Authority code	urn:ogc:def:cs:EPSG::
Code identifying the coordinate reference system	5711
Temporal extent	
Begin position	2001-01-01
End position	N/A
Dataset reference date	
Resource maintenance	
Maintenance and update frequency	Not planned

Lineage	The rainforest-polygons.shp file were extracted from the ; une_ss_2001.shp and lne_ss_2001.shp shapefiles (outlined above) and unioned to ascertain whether there were any overlaps (there were 17 very minute slivers). The theme table was simplified.; ; The rainforest-lines.shp file contains narrow patches of rainforest that were less than fifty metres wide and more than two hundred metres long which were captured into a line location dataset.; ; The rainforest-points.shp file contains areas of rainforest less than two hectares which were captured as a point with an alphabet code string delineating rainforest or dry rainforest.; ; To display the most up to date and comprehensive rainforest you must display all three files.
