

Title	Real-Time Surface Water Quality and Monitoring Data (Storages and Rivers)
Abstract	<p>The Surface Water Data API allow users and application developers to get time series hydrometric and water quality data for water monitoring stations across all NSW water sources. Product/Asset name: 1. Water Data (API) - Surface Water Data API - Time series WQ data 2. Water Quality External (API) - Field and laboratory sample WQ data - Link: https://api-portal.watrnsw.com.au/ Users will be required to register and subscribe to consume the API/fetch the data.</p> <p>WaterNSW is making the information available on the understanding that it does not warrant that the information is suitable for any intended use. In using the information supplied, the user acknowledges that they are responsible for any deductions or conclusions arrived at from interpretation of the data.</p>
Resource locator	
Real-Time Surface Water Quality and Monitoring Data (Storages and Rivers)	<p>Name: Real-Time Surface Water Quality and Monitoring Data (Storages and Rivers)</p> <p>Protocol: WWW:DOWNLOAD-1.0-http--download</p> <p>Description:</p> <p>Users will be required to register and subscribe to consume the API/fetch the data</p> <p>Function: download</p>
Data Quality Statement	<p>Name: Data Quality Statement</p> <p>Protocol: WWW:DOWNLOAD-1.0-http--download</p> <p>Description:</p> <p>DQS for Real-Time Surface Water Quality and Monitoring Data (Storages and Rivers). The Data Quality Statement is for users to understand how a particular dataset could be used and whether it can be compared with other, similar datasets. It provides a description of the characteristics of the data to help the user decide whether the data will be fit for their specific purpose (ICT Strategy, NSW Government accessed 23rd May 2016)</p> <p>Function: download</p>
