Title	Real-Time Surface Water Quality and Monitoring Data (Storages and Rivers)
Abstract	The Surface Water Data API allow users and application developers to get time series hydrometric and water quality data for water monitoring stations across all NSW water sources. Product/Asset name: 1. Water Data (API) - Surface Water Data API – Time series WQ data 2. Water Quality External (API) – Field and laboratory sample WQ data - Link: https://api-portal.waternsw.com.au/ Users will be required to register and subscribe to consume the API/fetch the data. WaterNSW is making the information available on the understanding that it does not warrant that the information is suitable for any intended use. In using the information supplied, the user acknowledges that they are responsible for any deductions or conclusions arrived at from interpretation of the data.

Real-Time Surface Water Quality and Monitoring Data (Storages and Rivers)	Name: Real-Time Surface Water Quality and Monitoring Data (Storages and Rivers) Protocol: WWW:DOWNLOAD-1.0-http--download Description: Users will be required to register and subscribe to consume the API/fetch the data Function: download
Data Quality Statement	Name: Data Quality Statement Protocol: WWW:DOWNLOAD-1.0-http--download Description: DQS for Real-Time Surface Water Quality and Monitoring Data (Storages and Rivers). The Data Quality Statement is for users to understand how a particular dataset could be used and whether it can be compared with other, similar datasets. It provides a description of the characteristics of the data to help the user decide whether the data will be fit for their specific purpose (ICT Strategy, NSW Government accessed 23rd May 2016) Function: download

Unique resource identifier

Code	fbcecb0b-c81e-49da-88e1-aba5afe2eeb2

Presentation form

Dataset language	English

Metadata standard

Name	ISO 19115
Edition	2016

Dataset URI	https://datasets.seed.nsw.gov.au/dataset/fbcecb0b-c81e-49da-88e1-aba5afe2eeb2

Purpose	Provision of time series hydrometric (water level and flow rate) and water quality data.

Status	Completed

Spatial representation

Type	vector

Spatial reference system

Code identifying the spatial reference system	4283

Topic category

Keyword set

keyword value	Water
	WATER-Lakes
	WATER-Quality
