Title	Schedule of Native Title Determination Applications
Abstract	Schedule of Native Title Determination Applications (as per s. 98A NTA – Other public records and information)
Resource loca	tor
<u>Show on SEED</u> <u>Web Map</u>	Name: Show on SEED Web Map
	Protocol: WWW:DOWNLOAD-1.0-httpdownload
	Description:
	Display dataset on SEED's map
	Function: download
Show on SEED	Name: Show on SEED Web Map
<u>Web Map</u>	Protocol: WWW:DOWNLOAD-1.0-httpdownload
	Description:
	Display dataset on SEED's map
	Function: download
<u>HTML</u> <u>Metadata -</u> Schedule of	Name: HTML Metadata - Schedule of Native Title Determination Applications
	Protocol: WWW:DOWNLOAD-1.0-httpdownload
Native Title	Description:
<u>Determination</u> <u>Applications</u>	Metadata is data that defines or describes the content, quality, format or structure of a dataset or information asset (NSW Government Standard Approach to Metadata July 2014)
	Function: download
XML Metadata	Name: XML Metadata - Schedule of Native Title Determination Applications
<u>- Schedule of</u> Native Title	Protocol: WWW:DOWNLOAD-1.0-httpdownload
Determination	Description:
<u>Applications</u>	Metadata is data that defines or describes the content, quality, format or structure of a dataset or information asset (NSW Government Standard Approach to Metadata July 2014). The Metadata is provided in an XML format to be utilised by other applications
	Function: download
<u>PDF Data</u> <u>Quality</u> <u>Statement -</u> <u>Schedule of</u> <u>Native Title</u> <u>Determination</u> <u>Applications</u>	Name: PDF Data Quality Statement - Schedule of Native Title Determination Applications
	Protocol: WWW:DOWNLOAD-1.0-httpdownload
	Description:
	The Data Quality Statement is for users to understand how a particular dataset could be used and whether it can be compared with other, similar datasets. It provides a description of the characteristics of the data to help the user decide whether the data will be fit for their specific purpose (ICT Strategy, NSW Government accessed 23rd May 2016)
	Function: download
External	Name: External Download Page - Schedule of Native Title Determination Applications
<u>Download Page</u> - Schedule of	Protocol: WWW:DOWNLOAD-1.0-httpdownload
- Schedule of <u>Native Title</u> <u>Determination</u> <u>Applications</u>	Description:
	The following link will redirect the user to an external page outside of SEED to download the dataset
	Function: download

of Native Title Determination Applications Protocol: WWW:DOWNLOAD-1.0-httpdownload Description: Applications Verb Feature Service (WFS) provides an interface that allows requests for geographical independent calls. (NSW Government - Spatial Web Services Register june 2015). WFS allows a user to spatially analyse the features within a datest. This service is aimed at advanced geographical information users, and will require access to geographical information system (GIS) software such as QGIS and ArcGIS/ArcMap. ArcGIS REST SERVICE - Determination Name: ArcGIS REST SERVICE - Schedule of Native Title Determination Applications Protocol: WWW:DOWNLOAD-1.0-httpdownload Description: An ArcGIS Server web service represents a GIS resource—such as a map, locator, or image—that is located on an ArcGIS Server site and is made available to client applications. Depending on the layers enabled, this web service allows a user to query its features and/or visualise the dataset. This service is aimed at avained a davanced geographical information users, and will require access to geographical information system (GIS) software such as ArcGIS/ArcMap. Presentation form Function: download Name Iso 19115 Edition 2016 Dataset language Iso 19115 Edition 2016 Dataset UR https://datasets.seed.nsw.gov.au/dataset/8f457610-84d5-4bfa-8dae-dd6ae7f40717 Spatial reference system (GIS) system (GIS) Spatial reference </th <th><u>WFS - Schedule</u></th> <th>Name: WFS - Schedule of Native Title Determination Applications</th>	<u>WFS - Schedule</u>	Name: WFS - Schedule of Native Title Determination Applications		
ApplicationsDescription:ApplicationsWeb Feature Service (WFS) provides an interface that allows requests for geographical independent callow. Story explained internation was requests for geographical information users, and within a datest. This service is almed at advanced geographical information users, and within a datest. This service is almed at advanced geographical information users, and within a datest. This service is almed at advanced geographical information users, and within a datest. This service is almed at advanced geographical information users, and will require access to geographical information system (GIS) software such as QGIS and ArcGIS REST SERVICE - Schedule of Native Title Determination Applications Service: Protocoi: WWW:DOWNLOAD-1.0-http-downloadArcGIS REST SERVICE - Schedule of Native Title Determination Applications Septidue is is forat on an ArcGIS Server web service represents a GIS resource—such as a map, locator, or applications. Depending on the layers enabled, this web service allows a user to query its features and/or visualise the dataset. This service is almed at advanced geographical information users, and will require access to geographical information service market set dataset.Code8f457610-8d45-4bfa-8dae-dd6ae7f40717Presentation formFinglishMateadata star-tIntegrify advanced access and/or visualise the dataset.NameISO 19115Edition2016Dataset URIhttps://datasets.seed.nsw.gov.au/dataset/8f457610-8d45-4bfa-8dae-dd6ae7f40717Spatial represer code identifying the spatialvectorCode identifying the spatial4283	Determination Applications ArcGIS REST SERVICE -	Protocol: WWW:DOWNLOAD-1.0-httpdownload		
features across the web using platform independent calls. (NSW Governmeint - Spatial Web Services Register June 2015). WFS allows a user to spatially analyse the features within a dateet. This service is alimed at advanced geographical information users, and will require access to geographical information system (GIS) software such as QGIS and ArcGIS KEST Streuction: downloadArcGIS REST SERVICE - Schedule of Native Title Determination Applications Protocol: WWW:DOWNLOAD-1.0-httpdownload Description: An ArcGIS Server web service represents a GIS resourcesuch as a map, locator, or 		Description:
