

<b>Title</b>	Repealed - State Environmental Planning Policy (Mining, Petroleum Production and Extractive Industries) 2007
<b>Alternative title(s)</b>	SEPP (Mining, Petroleum Production and Extractive Industries) 2007
<b>Abstract</b>	<p>This is a repealed State Environmental Planning Policy and has been superseded by the State Environmental Planning Policy (Resources &amp; Energy) 2021 as part of the Department's initiative to consolidate State Environmental Planning Policies to simplify and provide certainty to the planning system.</p> <p>Click here to go to the State Environmental Planning Policy (Resources &amp; Energy) 2021 Open Data page: <a href="https://www.planningportal.nsw.gov.au/opendata/dataset/state-environmental-planning-policy-resources-energy-2021">https://www.planningportal.nsw.gov.au/opendata/dataset/state-environmental-planning-policy-resources-energy-2021</a></p> <p>Go to the following link to find out more about the new consolidated SEPPs: <a href="https://www.planning.nsw.gov.au/Policy-and-Legislation/State-Environmental-Planning-Policies/Consolidated-state-environmental-planning-policies">https://www.planning.nsw.gov.au/Policy-and-Legislation/State-Environmental-Planning-Policies/Consolidated-state-environmental-planning-policies</a></p> <p>This historical record represents the EPI strategic agricultural land (Viticulture, Equine, Biophysical), the EPI Future Residential Growth Area, and the EPI Additional Rural Village Land for the State Environmental Planning Policy (Mining, Petroleum Production and Extractive Industries) 2007.</p>

<b>Purpose</b>	<p>The aims of this Policy are, in recognition of the importance to New South Wales of mining, petroleum production and extractive industries:(a) to provide for the proper management and development of mineral, petroleum and extractive material resources for the purpose of promoting the social and economic welfare of the State, and (b) to facilitate the orderly and economic use and development of land containing mineral, petroleum and extractive material resources, and (b1) to promote the development of significant mineral resources, and (c) to establish appropriate planning controls to encourage ecologically sustainable development through the environmental assessment, and sustainable management, of development of mineral, petroleum and extractive material resources, and (d) to establish a gateway assessment process for certain mining and petroleum (oil and gas) development:(i) to recognise the importance of agricultural resources, and (ii) to ensure protection of strategic agricultural land and water resources, and (iii) to ensure a balanced use of land by</p>

potentially competing industries, and (iv) to provide for the sustainable growth of mining, petroleum and agricultural industries.

## Lineage

This spatial dataset reflects the current planning legislation in NSW in particular the maps and legislation published on the NSW legislation website ([www.legislation.nsw.gov.au](http://www.legislation.nsw.gov.au)). The data production usually occurs in conjunction with the development of the Environmental Planning Instrument (EPI) it is connected to. Original data inputs are produced by Local Government or the Department according to map and data standards developed by the Department and published externally via the website. These data inputs are checked by data and cartographic staff as well as planning staff internally against the map and data standards as well as for accurate content. Once the planning instrument is notified, the input data will be incorporated into the relevant EPI datasets. The quality management processes involved in the data production to this point are routinely screened by internal and external auditors for certification under ISO 9001 - Quality Management Systems. At this point the various datasets are then combined into a new normalised data schema to suit the requirements of the online Planning Viewer. This occurs via various automated ETL processes. Although every care is taken in ETL processes to maintain accuracy sometimes differences between inputs and final normalised data can occur.
