

<b>Title</b>	Southern CRA - Riverina Highlands Mapping Extension, Biolinks
<b>Alternative title(s)</b>	Riverina Highlands Regional Vegetation Management Plan, Biolinks
<b>Abstract</b>	<p>This project was carried out by National Parks and Wildlife Service (NPWS) Southern CRA Unit for the Riverina Highlands Regional Vegetation Management Committee (RVMC). Two areas within the Riverina Highlands Regional Vegetation Management Area were outside the CRA boundary, so it was requested that the CRA vegetation mapping be extended to incorporate those blocks.</p> <p>Regional biolinks or corridors are fundamental for the movement of wildlife between remnants in the Riverina Highlands, and a priority for the conservation management of native vegetation.</p>

Lineage	<p>This dataset is part of the extension of the vegetation mapping using CRA methodology in two areas west of the original CRA boundary to match the Riverina Highlands Regional Vegetation Management Area boundary. Developed for the Riverina Highlands Native Vegetation Region by the Regional Vegetation Management Committee under the Native Vegetation Conservation Act 1997.</p> <p>The RHRVC has identified biolinks on ridgelines and riparian areas. Riparian vegetation is one the most cleared of all vegetation types within the region. Vegetation on ridgelines is often all that is left, due to the fact that the larger remnants are mostly on steep ridgelines unsuited to clearing for agriculture.</p>
