

Title	SPOT 6/7 Mosaic NSW 2023 Footprint layer
Abstract	<p>The NSW SPOT67 imagery cutlines product is an annual state-wide satellite imagery vector product provided by external suppliers for NSW Government. The first images were captured September 2022 and the second set of images from April 2023. This imagery data set has been acquired through GeoImage Pty Ltd and Airbus Defence and Space.</p> <p>The footprint layer is a shapefile that contains all of the information of the statewide capture of the SPOT imagery product. This includes the acquisition or image capture dates of the SPOT mosaic.</p> <p>SPOT imagery products offer high resolution over broad areas using the SPOT 6/7 satellites. A SPOT satellite acquisition covers large areas in a single pass at resolutions up to 1.5m. Such precise coverage is ideal for applications at national and regional scales from 1:250,000 to 1:15,000. SPOT 6/7 also includes the benefits of the near-infrared (NIR) which enables applications for detection of features not visible to the human eye, such as detecting and monitoring vegetation health.</p> <p>Acknowledgement when referencing: includes material © CNES__ (year of production), Distribution Airbus Services/SPOT Image, S.A, France, all rights reserved</p> <p>Contact spatial.imagery@environment.nsw.gov.au for further information or to request access to JDAP</p> <p>These image products are only available to other NSW Government agencies upon request.</p>

Lineage

The NSW SPOT6/7 imagery footprint product is an annual state-wide satellite imagery service provided by Geoimage for NSW Government. The first images were captured September 2021 through to till April 2022. The imagery scenes used to create the NSW mosaic includes Lord Howe Island. This imagery data set has been acquired through Geolimages Pty Ltd and Airbus Defence and Space.
