

Title	Repealed - State Environmental Planning Policy (Coastal Management) 2018
Abstract	<p>This is a repealed State Environmental Planning Policy and has been superseded by the State Environmental Planning Policy (Resilience and Hazards) 2021 as part of the Department's initiative to consolidate State Environmental Planning Policies to simplify and provide certainty to the planning system.</p> <p>Click here to go to the State Environmental Planning Policy (Resilience and Hazards) 2021 Open Data page: <a href="https://www.planningportal.nsw.gov.au/opendata/dataset/state-environmental-planning-policy-resilience-and-hazards-2021">https://www.planningportal.nsw.gov.au/opendata/dataset/state-environmental-planning-policy-resilience-and-hazards-2021</a></p> <p>Go to the following link to find out more about the new consolidated SEPPs: <a href="https://www.planning.nsw.gov.au/Policy-and-Legislation/State-Environmental-Planning-Policies/Consolidated-state-environmental-planning-policies">https://www.planning.nsw.gov.au/Policy-and-Legislation/State-Environmental-Planning-Policies/Consolidated-state-environmental-planning-policies</a></p> <p>This historical data sets included in this service identify the spatial extent of the SEPP (Coastal Management) 2018. This service is broken into a number of elements pertaining to their respective sections of the SEPP.</p> <p>Land Application - This dataset identifies the land to which the SEPP (Coastal Management) 2018 applies. Under section 5 of the Coastal Management Act 2016, the NSW coastal zone is defined by the areas identified in any of the Coastal Management SEPP 2018 layers, being the Coastal Wetlands and Littoral Rainforests Area, Coastal Environment Area, Coastal Use Area, and Coastal Vulnerability Area.</p> <p>Coastal Wetlands and Littoral Rainforests - This spatial dataset identifies coastal wetlands and littoral rainforests mapped in NSW for the purpose of the SEPP Coastal Management:</p> <p>Coastal Wetlands - are identified as plant communities dominated by any of the following six vegetation types:</p> <ul style="list-style-type: none"> <li>• mangroves</li> <li>• salt marshes</li> <li>• melaleuca forests</li> <li>• casuarina forests</li> <li>• sedgelands</li> <li>• brackish and freshwater swamps</li> <li>• wet meadows</li> </ul> <p>Littoral Rainforest - are identified as plant communities dominated by any of the following five combinations of tree species:</p> <ul style="list-style-type: none"> <li>• riberry</li> <li>• broad-leaved lilly pilly</li> <li>• tuckeroo</li> <li>• brush box</li> <li>• yellow tulip</li> <li>• bauerella</li> <li>• red olive plum</li> <li>• plum pine</li> <li>• lilly pilly</li> <li>• various figs</li> <li>• cabbage palm and plum pine</li> </ul> <p>The Coastal Wetlands and Littoral Rainforests Area also includes a 100-metre proximity area around the outer extent of the mapped coastal wetlands and littoral rainforests. The proximity area spatial datasets are known as the Proximity Area for Coastal Wetlands and the Proximity Area for Littoral Rainforests.</p> <p>Coastal Use Area - This spatial dataset identifies the Coastal Use Area (CUA). The CUA represents the land that is adjacent to coastal waters, estuaries and coastal lakes and lagoons.</p> <p>Coastal Environment Area - This spatial dataset identifies the Coastal Environment Area (CEA). CEA represents the ocean to the NSW jurisdictional limit, estuary and lake waters and surrounding land, where controls relate to protecting the natural environment. For this layer, three spatial regions (Sydney Harbour Foreshore, Greater Sydney, Regional NSW) are defined which interact with different water body types (taken from various data sources) using a rule set to produce the layer.</p> <p>Coastal Vulnerability Area - For clarity, there is no spatial dataset for the Coastal Vulnerability Area at this time. This information will be updated as datasets for Coastal Vulnerability Areas are adopted into the Coastal Management SEPP.</p>

Description:

Data quality statement for State Environmental Planning Policy (Coastal Management) 2018

Function: download

Unique resource identifier

Code 7096e6e8-fa40-49fa-8fb9-a794277eb332

Presentation form Map digital

Edition 1

Dataset language English

Metadata standard

Name ISO 19115

Edition 2016

Dataset URI <https://datasets.seed.nsw.gov.au/dataset/7096e6e8-fa40-49fa-8fb9-a794277eb332>

Purpose This dataset aims to promote an integrated and co-ordinated approach to land use planning in the coastal zone in a manner consistent with the objects of the Coastal Management Act 2016, including the management objectives for each coastal management area, by mapping the 4 coastal management areas that comprise the NSW coastal zone for the purpose of the definitions in the Coastal Management Act 2016

Status Obsolete

Spatial representation

Type vector

Spatial reference system

Code identifying the spatial reference system 4283

Equivalent scale 1:None
