

Title	Strategic Regional Land Use Policy (SRLUP) - Strategic Agricultural Land - Viticulture
Abstract	<p>A polygon dataset showing critical industry Viticulture clusters in the Upper Hunter region. The viticulture cluster includes a highly integrated concentration of vineyards and associated wineries and tourism infrastructure in a rural landscape. The region's unique terrain and climate, its heritage vines and diversity of soil types all contribute to the specific quality and characteristics of grapes produced in the area, especially Hunter semillon and shiraz. Also of importance is the Hunter Valley wine tourism branding based on its natural environment and visual landscape attributes and its proximity to metropolitan areas. The mapped viticulture cluster includes the Pokolbin and Broke-Fordwich Geographic Indication (GI) sub-regions<sup>6</sup> industry proposed GI subregions covering the Parish of Belford and localities of Lovedale and Mount View and part of the Upper Hunter Wine GI around Denman.</p>

Service -  
SRLUP SAL  
Viticulture

Protocol: WWW:DOWNLOAD-1.0-http--download

Description:

An ArcGIS Server web service represents a GIS resource—such as a map, locator, or image—that is located on an ArcGIS Server site and is made available to client applications.

Depending on the layers enabled, this web service allow a user to query its features and/or visualise the dataset.

This service is aimed at advanced geographical information users, and will require access to geographical information system (GIS) software such as ArcGIS/ArcMap.

Function: download

**Unique resource identifier**
