## Title Streamwatch **Abstract** Streamwatch is an educational and capacity-building program that utilises the passion of community groups to monitor the quality and health of local watercourses across the greater Sydney and Blue Mountains and Illawarra regions. This dataset includes physical and chemical parameters collected during the period from 1990 to 2020. Environmental monitoring data was collected monthly by trained volunteers during this period. The Streamwatch program was originally funded and managed by Sydney Water, transferred to the Australian Museum in 2012 and then to Greater Sydney Landcare Network (GSLN) in 2019. Streamwatch water quality data methodologies align with the national Waterwatch program and GSLN understands the importance of making this data publicly available Resource locator **Show on SEED** Name: Show on SEED Web Map Web Map Protocol: WWW:DOWNLOAD-1.0-http--download Description: Display dataset on SEED's map Function: download **PDF Data** Name: PDF Data Quality Statement - Streamwatch Quality Protocol: WWW:DOWNLOAD-1.0-http--download Statement -Streamwatch Description: The Data Quality Statement is for users to understand how a particular dataset could be used and whether it can be compared with other, similar datasets. It provides a description of the characteristics of the data to help the user decide whether the data will be fit for their specific purpose (ICT Strategy, NSW Government accessed 23rd May 2016) Function: download Name: Streamwatch Manual <u>Streamwatch</u> Manual Protocol: WWW:DOWNLOAD-1.0-http--download Description: Streamwatch program training manual Function: download Name: Streamwatch data file Streamwatch data file Protocol: WWW:DOWNLOAD-1.0-http--download Description: Excel spreadsheet containing Streamwatch raw data Function: download Unique resource identifier Code 6069288a-bca7-464e-901d-199042108414 Presentation form
