Lineage	Linework derived from NSW Department of Lands aerial photography, digitised on screen into ArcView3.3
Limitations on public access	

Scope	dataset
DQ Completeness Commission	
Effective date	2009-01-10
Explanation	The dataset is complete for the mapped area.
DQ Completeness Omission	
Effective date	1901-01-01
DQ Conceptual Consistency	
Effective date	1901-01-01
Explanation	The GIS package (ArcInfo) was used to do topological consistency check to detect flaws in the spatial data structure and to flag them as errors. This check insures that all classified polygons are closed, nodes are formed at the intersection of lines and that there is only one label within each polygon.
DQ Topological Consistency	
Effective date	1901-01-01
Explanation	Checked for missing attributes All attributes were checked
DQ Absolute External Positional Accuracy	
Effective date	1901-01-01
Explanation	Precision: 1m to 10m Determination: Deductive estimate. Ad-hoc comparisons with 1:25,000 layer data and various sorts of imagery indicated good correlation in terms of shape and size but with errors of the order indicated above in terms of position.
DQ Non Quantitative Attribute Correctness	
Effective date	1901-01-01
Explanation	Attributes of the dataset include vegetation community. Vegetation community is determined by aerial photograph interpretation and statistical analysis of quantitative plots with post mapping fieldwork to check communities, accuracy for each of the attributes is estimated to be high.
