| <b>Title</b>                                   | The Native Vegetation of the Woronora OHares and Sydney Metropolitan Catchments (NPWS 2003) VISID 2387   |
| <b>Alternative title(s)</b>                    | woronora_VISmap_2387   |
| <b>Abstract</b>                                | <p>This layer contains digital vegetation mapping of the NPWS (2003) Native vegetation of the Woronora, O'Hares and Metropolitan Catchments. NSW National Parks and Wildlife Service. The layer includes the boundaries of vegetation communities and lists attributes including vegetation community, structure and disturbance.</p> <p>NPWS (2003) Native vegetation of the Woronora, O'Hares and Metropolitan Catchments. NSW National Parks and Wildlife Service, Sydney</p> <p>ANZNS0208000234</p> <p>VIS ID 2387</p> |

| Scope  | dataset  |
| <b>DQ Completeness Commission</b>                |  |
| Effective date                                   | 2009-01-10   |
| Explanation                                      | The dataset is complete for the mapped area.   |
| <b>DQ Completeness Omission</b>                  |  |
| Effective date                                   | 1901-01-01   |
| <b>DQ Conceptual Consistency</b>                 |  |
| Effective date                                   | 1901-01-01   |
| Explanation                                      | The GIS package (ArcInfo) was used to do topological consistency check to detect flaws in the spatial data structure and to flag them as errors. This check insures that all classified polygons are closed, nodes are formed at the intersection of lines and that there is only one label within each polygon. |
| <b>DQ Topological Consistency</b>                |  |
| Effective date                                   | 1901-01-01   |
| Explanation                                      | Checked for missing attributes All attributes were checked   |
| <b>DQ Absolute External Positional Accuracy</b>  |  |
| Effective date                                   | 1901-01-01   |
| Explanation                                      | Precision: 1m to 10m Determination: Deductive estimate. Ad-hoc comparisons with 1:25,000 layer data and various sorts of imagery indicated good correlation in terms of shape and size but with errors of the order indicated above in terms of position.  |
| <b>DQ Non Quantitative Attribute Correctness</b> |  |
| Effective date                                   | 1901-01-01   |
| Explanation                                      | Attributes of the dataset include vegetation community. Vegetation community is determined by aerial photograph interpretation and statistical analysis of quantitative plots with post mapping fieldwork to check communities, accuracy for each of the attributes is estimated to be high.                     |
