Title	Vegetation Condition Benchmarks V1.2
Abstract	Vegetation Condition Benchmarks describe the reference state to which sites are compared to score their site-scale biodiversity values or set goals for management or restoration. This file contains the most current vegetation condition benchmarks available in BioNet and associated information including: large tree threshold size; benchmark confidence; and the classification level at which benchmarks were created.
	The 'Vegetation Condition Benchmarks V1.2' file contains benchmarks for the full combination of Bioregions in NSW (n=18) and vegetation classes for which data were available (n=95). There are therefore 1,710 different regional vegetation class (RVCs) rows of benchmarks contained (18x95). Many of these RVCs do not exist in the current landscape but were the product of the modelling approaches used for cover and richness (e.g. Subtropical Rainforests in the Australian Alps Bioregion). Approximately 650 RVCs are extant in the current landscape.
	To view the four files that this dataset is derived from, refer to the 'Dataset relationship' section below.
	For further details see Oliver I, Dorrough J, Yen JDL, McNellie MJ and Watson CJ (2019) Native Vegetation Integrity Benchmarks: Technical details supporting Static Benchmarks June 2019 (Version 1.2). Department of Planning, Industry and Environment.

	Description:
	This Excel file contains the most current vegetation condition benchmarks available in BioNet and the classification levels at which benchmarks were created.
	Function: download

Unique resource identifier

Code	7367d4ef-2cdc-477b-9e23-15661f380b42

Presentation form	Table digital

Edition	1.2

Dataset language	English

Metadata standard

Name	ISO 19115
Edition	2016

Dataset URI	https://datasets.seed.nsw.gov.au/dataset/7367d4ef-2cdc-477b-9e23-15661f380b42

Purpose	Legislative and regulatory requirements (esp BAM Method and Calculator)

Status	On going
Spatial representation type	None

Spatial reference system

Code identifying the spatial reference system	4283

Topic category

Keyword set

keyword value	VEGETATION
	VEGETATION-Floristic
	VEGETATION-Structural

Originating controlled vocabulary

Title	ANZLIC Search Words
Reference date	2008-05-16

Geographic location

West bounding longitude	141
East bounding longitude	154
North bounding latitude	-37.7
South bounding latitude	-28

Vertical extent information

Minimum value	-100
Maximum value	2228

Coordinate reference system

Authority code	urn:ogc:def:cs:EPSG::
Code identifying the coordinate reference system	5711

Temporal extent

Begin position	1978-09-20
End position	N/A

Dataset reference date

Resource maintenance

Maintenance and update frequency	Irregular
