

Title	Vegetation of Winburndale Nature Reserve. VIS_ID 1018
Alternative title(s)	WinburndaleNR_E_1018
Abstract	Vegetation map of Winburndale Nature Reserve. Vegetation descriptions from Boden,R. and Mitchell,L(1996) The NSW NPWS commissioned vegetation surveys of Winburndale NR and Nangar, Conimbla and Weddin Mountains NPs, as the first stage in preparing fire management plans. Key project tasks were literature review to compile an annotated bibliography, and vegetation surveys to describe communities, their floristic composition and conservation status. Mapping produced by Boden & Mitchell was deemed insufficient for reserve management needs. Subsequently, more detailed mapping (this dataset) was undertaken by Roger Lembit under contract to NPWS Bathurst District office in 1997. VIS_ID 1018

Unique resource identifier	
Code	250b260c-2904-44a3-a52b-d3dee46b4da1
Presentation form	Map digital
Edition	unknown
Dataset language	English
Metadata standard	
Name	ISO 19115
Edition	2016
Dataset URI	https://datasets.seed.nsw.gov.au/dataset/250b260c-2904-44a3-a52b-d3dee46b4da1
Purpose	To map the vegetation of Winburndale Nature Reserve.
Status	Completed
Spatial representation	
Type	vector
Geometric	curve

Object Type	
Geometric Object Count	1
Spatial reference system	
Code identifying the spatial reference system	4283
Equivalent scale	1:None
Additional information source	Boden,R & Mitchell,L (1996). Bathurst District Vegetation Survey. A report for the National Parks and Wildlife Service, Bathurst District. Unpublished. (ERM Mitchell McCotter).

Lineage	The NSW NPWS commissioned vegetation surveys of Winburndale NR and Nangar, Conimbla and Weddin Mountains NPs, as the first stage in preparing fire management plans. Key project tasks were literature review to compile an annotated bibliography, and vegetation surveys to describe communities, their floristic composition and conservation status. Floristic Classification derived from quantitative analysis of floristic plots. Vegetation patterns on the original Boden & Mitchell (1996) map were established from previous available information (NPWS, DLWC, SF, Local councils), field surveys and statistical analysis. Mapping produced by Boden & Mitchell was deemed insufficient for reserve management needs. Subsequently, more detailed mapping (this dataset) was undertaken by Roger Lembit under contract to NPWS Bathurst District office in 1997. Preliminary identification of vegetation communities was undertaken by stereoscopic interpretation of colour and textural differences evident on aerial photographs. Overlays for aerial photographs were marked to display vegetation polygons and annotated with codes identifying vegetation communities described in the Bathurst District Vegetation Survey report (Boden & Mitchell 1996). The preliminary map of polygons was ground truthed using floristic data from the 1995/96 surveys and the final vegetation polygons were transferred to hardcopy 1:50 000 topographical maps. Polygons were digitised by NPWS staff using the ERMS GIS package. New attribute added (vegetation associations) by EPRD, North-west Branch 06/04.
