Title	Vegetation survey and mapping of Tinkrameanah National Park VIS ID 3995		
Alternative title(s)	TinkrameanahNP_2008_E_3995		
Abstract	Vegetation survey and mapping of Tinkrameanah National Park in 2008, commissioned by NPWS Narrabri Region. Five communities were determined based on floristic analysis of 20 x 20 m survey sites, and described using dominant species and structural characteristics. Vegetation communities were mapped using ground truthing, position in landscape and stereo interpretation of aerial photos captured at 1:50,000. Lineage and attribution accuracy are unknown. Error found in typing of one polygon by NPWS Northern Plains Region staff in February 2012. Community description was changed (ObjectID_1 = 2) from 'C3: Narrow-leaved Ironbark - White Cypress Pine' to 'Undescribed White Box - White Cypress Pine'. White Box - White Cypress Pine was not identified as a community in the floristic analysis so is not described in the associated report. NSW Plant Communities (VCA), Classes and Formations (per Keith 2004) were assigned by Western PaCS Dubbo. Those provided in the original report were incorrectly assigned. VIS_ID 3995

Lineage

Dataset was originally digitised by botanical contractor. Error found in typing of one polygon by NPWS Northern Plains Region staff in February 2012. Community description was changed (ObjectID_1 = 2) from 'C3: Narrow-leaved Ironbark - White Cypress Pine' to 'Undescribed White Box - White Cypress Pine'. White Box - White Cypress Pine was not identified as a community in the floristic analysis so is not described in the associated report.

NSW Plant Communities (VCA), Classes and Formations (per Keith 2004) were assigned by Western PaCS Dubbo. Those provided in the original report were incorrectly assigned.
