

Title	Vegetation Survey of Binnaway Nature Reserve. VIS_ID 840
Alternative title(s)	BinnawayNR_E_840
Abstract	The composition and extent of the present vegetation in Binnaway Nature Reserve is described and mapped at 1:50 000 scale from quadrat samples, field traverses and aerial photograph interpretation. Three vegetation communities are described and 136 species (139 taxa) of vascular plants recorded from 42 families, several of which are at their north-western geographical limit or regionally restricted. Presentation form	Map digital
Edition	unknown
Dataset language	English
Metadata standard	
Name	ISO 19115
Edition	2016
Dataset URI	https://datasets.seed.nsw.gov.au/dataset/d5e8086c-1e13-43d8-b032-dae9eb10df3e
Purpose	To map the composition and extent of the present vegetation in Binnaway Nature Reserve.
Status	Completed
Spatial representation	
Type	vector
Geometric Object Type	curve
Geometric Object Count	1
Spatial reference system	

Code identifying the spatial reference system	4283
Equivalent scale	1:None
Additional information source	Porteners, M.F. (1998). Vegetation Survey of Binnaway Nature Reserve. Report to the NSW National Parks and Wildlife Service. (NSW NPWS, Sydney).

Lineage	Colour aerial photographs at 1:25 000 scale (taken in November 1993) formed the basis of the vegetation map polygons. The images were interpreted stereoscopically for patterns of vegetation and geomorphology, and matched to the vegetation site data. A provisional vegetation map was drafted and the linework and boundaries checked during ground-truthing in December 1997. The study area was traversed and particular sites investigated to confirm polygon labels and resolve vegetation boundaries. The final vegetation polygons were then transferred and corrected to the 1:50 000 topographic map sheet and coded, ready for digitising into a geographic information system.
