

Title	Vegetation Survey of Weetalibah Nature Reserve VIS_ID 1014
Alternative title(s)	WeetalibahNR_E_1014
Abstract	Vegetation map digitised from Porteners, M.F. (1998). The composition and extent of the present vegetation in Weetalibah Nature Reserve is described and mapped at 1:50 000 scale from quadrat samples, field traverses and aerial photograph interpretation. Three vegetation communities are described and 125 species (127 taxa) of vascular plants recorded from 38 families, several of which are at their north-western geographical limit or regionally restricted. One species is listed under Schedule 2 of the 1995 NSW Threatened Species Conservation Act." VIS_ID 1014

Lineage	Colour aerial photographs at 1:25 000 scale (taken in November 1993) formed the basis of the vegetation map polygons. The images were interpreted stereoscopically for patterns of vegetation and geomorphology, and matched to the vegetation site data.
