

Title	Very Highly Vulnerable Ecosystems, NPWS South Coast Region, Validated 2002. VIS_ID 4130
Alternative title(s)	EcosystemsVulnRev02_SC_E_4130
Abstract	Validating the extent of modelled "rare and vulnerable forest ecosystems" identified during the Southern CRA (1997-2000) was required for ecologically sustainable conservation management of reserves within the NPWS South Coast Region. The validation was for 47 forest ecosystems out of a total of 96 forest ecosystems that occur in the NPWS South Coast Region. VIS_ID 4130

Unique resource identifier	
Code	32531ea8-2e08-4a43-bbc9-48682fa3dae2
Presentation form	Map digital
Edition	Not known
Dataset language	English
Metadata standard	
Name	ISO 19115
Edition	2016
Dataset URI	https://datasets.seed.nsw.gov.au/dataset/32531ea8-2e08-4a43-bbc9-48682fa3dae2
Purpose	To validate the extent of modelled "rare and vulnerable forest ecosystems".
Status	Completed
Spatial representation	
Type	vector
Spatial reference system	
Code identifying the spatial reference system	4283
Equivalent scale	1:None

Lineage

Key environmental layers were first identified that could support the desktop updating of the vegetation map, as well as for planning of field survey of new floristic samples within targeted vegetation polygons identified by the NPWS. Base layers considered useful in this project are shown in Table 1 (see Report).

Geological data supplied by Department of Mineral Resources were checked for coverage and consistency.

To help with interpretation of the canopy layer used in the revision of the mapping of vegetation, a Landsat TM coverage, produced in 1999, was used as a base background layer.

See Report for more details.
