| Title | Washpool National Park Eastern Section Vegetation 2013 VIS_ID 4370 |
| Alternative title(s) | WashpoolEasternVeg2013_VIS4370; WashpoolEasternNP_2015_E_4370 |
| Abstract | <p>Vegetation community mapping for eastern Washpool National Park, 2013. A Northern Tablelands NPWS Region contract with EcoLogical. Mapped at 1:25000 scale.</p> <p>Washpool National Park, covering an area of over 68,000 hectares (ha), is located on the edge of the Northern Tablelands and North Coast in north-eastern NSW. In 2014, the Northern Tablelands office of the NSW Office of Environment and Heritage (OEH) commissioned Eco Logical Australia to conduct a comprehensive vegetation survey of the eastern section of Washpool National Park (EWNP). This area, consisting of approximately 42 576 ha, includes the largest continuous patch of rainforest in NSW. This report details the results of this vegetation survey and includes sections on previous work undertaken in the study area, classification and mapping of the vegetation communities, a comprehensive plant species list, rare and threatened plant species, vegetation communities of conservation significance, introduced weeds of significance and management recommendations. Lineage

1:25,000 topographic maps marked with vegetation mapping linework were digitised via tablet using E-RMS software by NPWS staff in the Armidale/Coffs Harbour Office.

Limitations on public access

Scope dataset

DQ Completeness Commission

Explanation Complete to Reserve boundary.

DQ Completeness Omission

Explanation Complete to Reserve boundary.

DQ Conceptual Consistency

Explanation Adheres to conceptual schema rules for Veg Fire datasets such as this.

DQ Topological Consistency

Explanation Topologically consistent at 1:25,000 scale as determined from aerial photography.

DQ Absolute External Positional Accuracy

Explanation Within range at 1:25,000 scale.

DQ Non Quantitative Attribute Correctness

Explanation Attributes correct for broad Veg Fire datasets such as this.
