

<b>Title</b>	Water Modelling-Modelled Data-Regional Water Strategy
<b>Alternative title(s)</b>	Surface water modelling
<b>Abstract</b>	<p>The datasets provided contain modelled daily streamflow, and storage volume data for several NSW river systems. These data were generated by simulating baseline river system models used to inform the development of Regional Water Strategies. The models were simulated for three different climate scenarios: instrumental climate (about 130 years), paleo-stochastic climate (about 10,000 years), and paleo-stochastic climate with climate projection based on NARClIM 1.0 (about 10,000 years).</p> <p>Each modelled output is published as a ZIP file which contains two pdf files (.pdf) and three time series data (.csv).</p> <p>Note: To access and download datasets for specific regions, such as the Lachlan river system, please navigate to the respective child assets beneath this parent asset.</p> <p>For more information on the NSW regional water strategies program, please refer to the following website. <a href="https://www.dpie.nsw.gov.au/water/our-work/plans-and-strategies/regional-water-strategies">https://www.dpie.nsw.gov.au/water/our-work/plans-and-strategies/regional-water-strategies</a></p> <hr/> <p>Note: If you would like to ask a question, make any suggestions, or tell us how you are using this dataset, please visit the <a href="#">NSW Water Hub which has an online forum</a> you can join.</p>

**Dataset URI****Purpose**

The dataset provided contains modelled daily streamflow, storage inflow, and storage volume data for several NSW river systems. These data were generated by simulating baseline river system models used to inform the development of Regional Water Strategies. The models were simulated for three different climate scenarios: instrumental climate (about 130 years), paleo-stochastic climate (about 10,000 years), and paleo-stochastic climate with climate projection based on NARClIM 1.0 (about 10,000 years). Notwithstanding the model's inherent limitations, these data provide a reasonable representation of what we might expect under the existing WSP's operational and development plans for these three climate scenarios. For more information on the NSW regional water strategies program, please refer to the following website. <https://www.dpie.nsw.gov.au/water/our-work/plans-and-strategies/regional-water-strategies>
