

Title	Western Riverina Vulnerable Vegetation. VIS_ID 4095
Alternative title(s)	WesternRiverinaVulnerable_E_4095
Abstract	Vulnerable vegetation of the Western Riverina. The Current Vegetation - 2002 mapping of native vegetation depicts the native vegetation that currently exists within the WRNVR (Western Riverina Native Vegetation Region), according to the best and most recently available mapping products. These mapping products comprised several existing, modified and new spatial data sets compiled over the period from 1998 through to 2002. Decisions were made by the Western Riverina Regional Vegetation Committee (WRRVC) on the categories of vegetation types to be used to describe the vast ecological diversity of the WRNVR in a summarised format. These summarised vegetation types permitted the union of several disparate data sets. These broad groupings of vegetation types use the dominant overstorey species as the key label. VIS_ID 4095

Unique resource identifier	
Code	f173099b-fc3f-47a1-b9d4-846e11eb3317
Presentation form	Map digital
Edition	Not known
Dataset language	English
Metadata standard	
Name	ISO 19115
Edition	2016
Dataset URI	https://datasets.seed.nsw.gov.au/dataset/f173099b-fc3f-47a1-b9d4-846e11eb3317
Purpose	To indicate vulnerable vegetation within the WRNVR
Status	Completed
Spatial representation	
Type	vector

Spatial reference system	
Code identifying the spatial reference system	4283
Equivalent scale	1:None
Additional information source	Current List of Codes Used in the Data SetCurrent Vegetation – 2002 categoriesRiverine forest / woodland:1Black Box woodland:2Murray Callitris mixed woodland (sandhills):3Lachlan Callitris Mixed woodland:4Bimble Box/Callitris mixed woodland (rocky ridge):5Bimble Box woodland:6Western Grey Box woodland:7Prior stream Callitris woodland:9Boree woodland:10Belah / Rosewood woodland:11Mallee woodland:12Lignum / Nitre Goosefoot / reed bed / canegrass / wetland:13Dillon Bush shrubland:14Black Bluebush shrubland:15Old Man Saltbush shrubland:16Bladder Saltbush shrubland:17Cottonbush shrubland:18Mixed chenopod shrubland:19Native grassland:20 & 29 (29 Murray area)Non-native grassland:25Cleared:26Other vegetation:27Murray area - unmapped:26Note: Coding details are shown in the attribute table accompanying the corresponding digital data.

Lineage	<p>Data sets originated from mapping and reports including: 1. Roberts, I and Roberts, J (2001) Plains-wanderer (<i>Pedionomus torquatus</i>) Habitat Mapping including Woody Vegetation and other Landscape Features. Riverina Plains, NSW. Unpublished Report to NSW National Parks and Wildlife Service and Western Riverina Regional Vegetation Committee. 2. Brickhill, J (2000) Vegetation ‘Gap-Fill’ Mapping – Griffith and Roto areas. Unpublished maps and notes for use by the WRRVC. NSW National Parks and Wildlife Service. 3. Lucas, S and Speirs, P (NSW Department of Land and Water Conservation) and King, P (Murray Irrigation Limited) (2001) Tree Density Mapping DLWC Murray Region. 4. White, M (2001) ‘White Vegetation mapping 2001’ (derived from NSW Riverina Bioregion mapping of native vegetation communities sponsored by NSW National Parks and Wildlife Service and WRRVC). Ecology Australia Pty Ltd, Victoria. 5. Scott, J A (1992) The natural vegetation of the Balranald-Swan Hill 1:250,000 map. National Herbarium of New South Wales, Royal Botanic Gardens, Sydney, <i>Cunninghamia</i> 2 (4): 597 - 692. 6. Porteners, M F (1993) The natural vegetation of the Hay Plain: Booligal-Hay and Deniliquin-Bendigo 1:250,000 maps. National Herbarium of New South Wales, Royal Botanic Gardens, Sydney, <i>Cunninghamia</i> 3 (1): 1-122. 7. Eardley, K A (1999) A Foundation for Conservation in the Riverina Bioregion. NSW National Parks and Wildlife Service, Hurstville. 8. Sivertsen, D and Metcalfe, L (1995) The natural vegetation of the Southern Wheat-Belt Forbes and Cargellico 1:250,000 maps. NSW National Parks and Wildlife Service and National Herbarium of New South Wales, Royal Botanic Gardens, Sydney, <i>Cunninghamia</i> 4 (1): 103 -128.</p> <p>Note: Some gaps in data coverage and anomalies in the amalgamated data may occur. These should be noted for review by future native vegetation mapping programs.</p>		
Limitations on public access			
Scope	dataset		
DQ Completeness Commission			
Explanation	complete		
DQ Completeness Omission			
Explanation	complete		
DQ Topological Consistency			
Explanation	Polygons are tagged. Variable topological consistency exists		
DQ Absolute External Positional Accuracy			
Explanation	unknown		
DQ Non Quantitative Attribute Correctness			
Explanation	All attributes have been described at the primary level, with some attributes being described at the secondary level.
